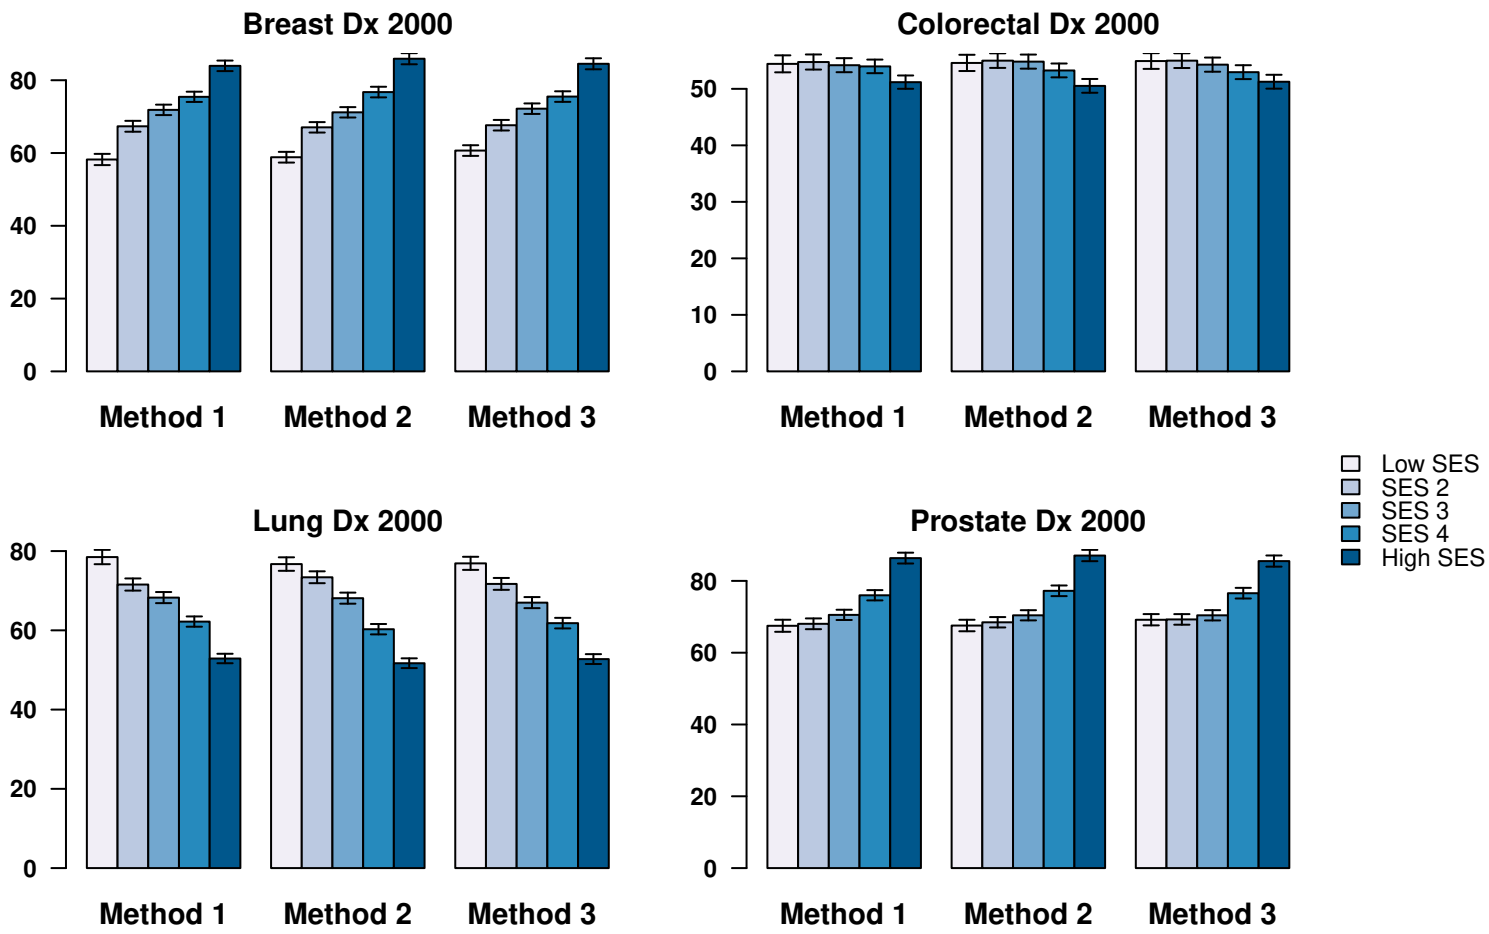
Electronic Supplementary Material 7 Compare the two alternative methods for constructing the SES index to the originally proposed method on estimating the age−adjusted incidence rates for 2000 by Yost's SES quintile and cancer site, SEER 17combined*.
*Alaska Native Tumor Registry and Louisiana Tumor Registry are excluded



Note: Method 1=Overall Index based on unadjusted Median Family Income
Method 2=Overall Index based on adjusted (for cost−of−living) Median Family Income
Method 3=Separate Index by registry based on unadjusted Median Family Income
