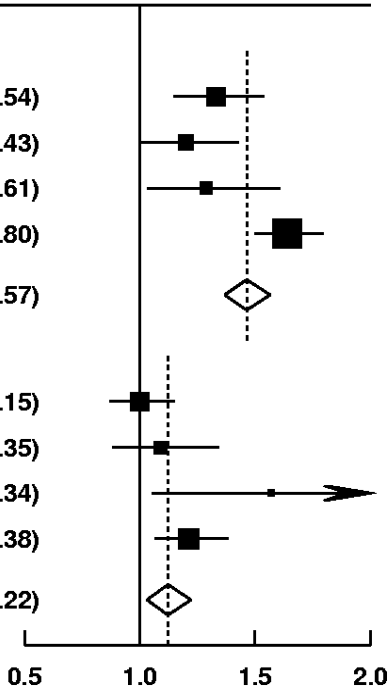
Study	Age group	Restricted to postmenopausal women	false positive / screen negative HRT user	never user	RR (95% CI)
Current versus never use of HRT					
Laya (1996)[8]	50+	yes	367/1720	564/3228	**1.33 (1.15-1.54)**
Thurfjell (1997)[9]	50+	no	181/2918	716/13897	**1.20 (1.01-1.43)**
Christiansen (2000)[10]	40-69	no	122/1445	489/7398	**1.29 (1.03-1.61)**
Million Women Study (2004)[3]	50-64	yes	1157/27477	1057/43370	**1.64 (1.50-1.80)**
Total			**1827/33560**	**2826/67893**	**1.46 (1.37-1.57)**
Past versus never use of HRT					
Laya (1996)[8]	50+	yes	410/2427	564/3238	**1.00 (0.87-1.15)**
Thurfjell (1997)[9]	50+	no	114/2032	716/13897	**1.09 (0.88-1.35)**
Christiansen (2000)[10]	40-69	no	24/269	489/7398	**1.57 (1.05-2.34)**
Million Women Study (2004)[3]	50-64	yes	382/13399	1057/43370	**1.21 (1.06-1.38)**
Total			**930/18127**	**2826/67903**	**1.12 (1.03-1.22)**



Test for heterogeneity for current use of HRT versus never: $\chi^2_3 = 13.9$; P = 0.003

Test for heterogeneity for past use of HRT versus never: $\chi^2_3 = 6.8$; P = 0.08
