

Supplementary Figure 1. Negative controls for each stain. All images are at the same magnification. *Scale bar 100 μm.*

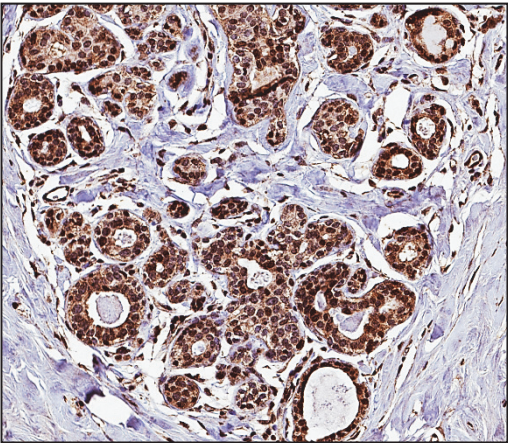

Supplementary Figure 2. Images depicting low/moderate/high expression for Plasminogen (A) and pSTAT3 (B). All images are at the same magnification. *Scale bar* 100 μ m.

A. Plasminogen

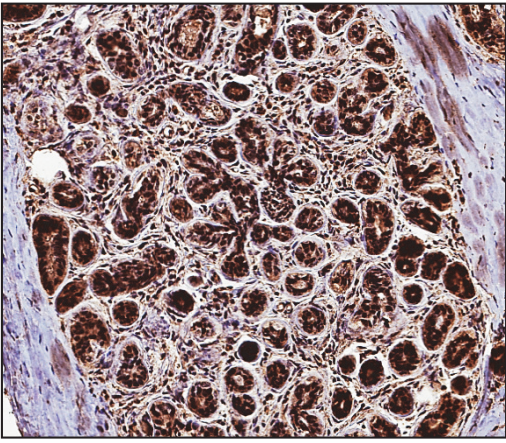

Low Expression

Moderate Expression

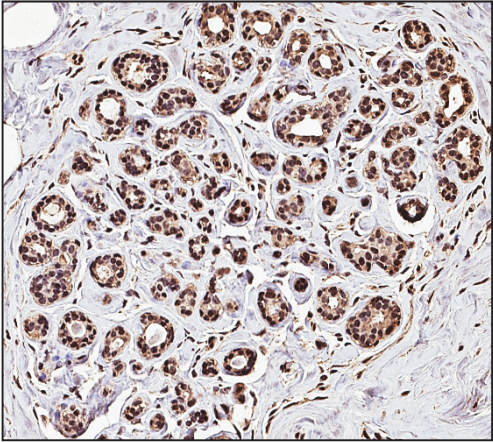

High Expression

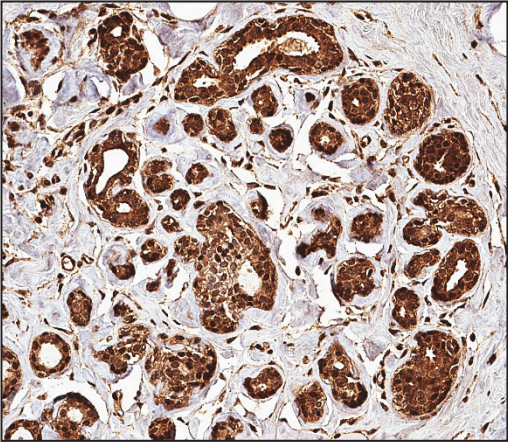

B. pSTAT3

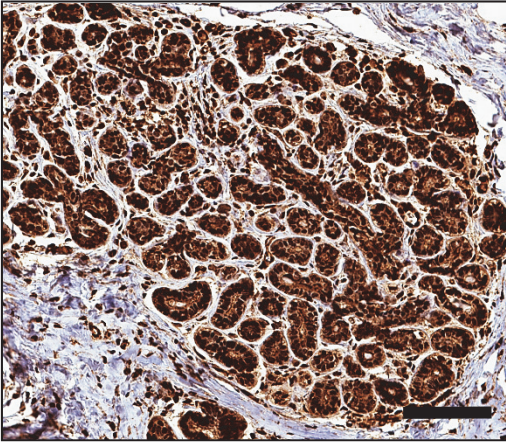

Low Expression

Moderate Expression

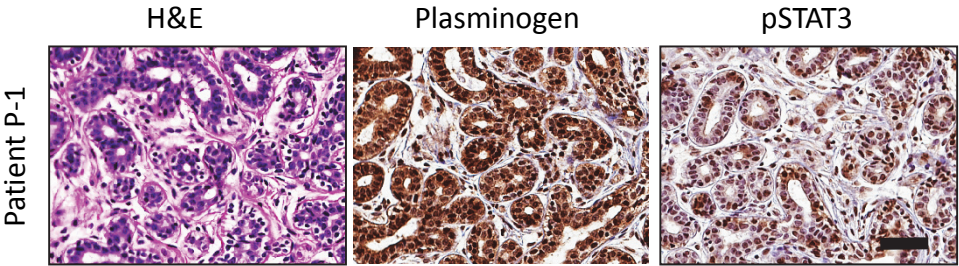

High Expression

Supplementary Figure 3. Images depicting higher Plasminogen/lower pSTAT3 staining for two patients showing progressive LI (A) and lower Plasminogen/higher pSTAT3 for two cases showing non-progressive LI (B). All images are at the same magnification. Scale bar 50 μ m.

A. Progressive LI

B. Non-progressive LI
