Note: Controls include unemployment, GDP growth and population, CPI, and poverty rate. GDP: Gross Domestic Product; CPI: Consumer Price Index; EPU-N: economic policy uncertainty index arising from national/international sources; EPU-S: economic policy uncertainty index arising from state/local sources; FE: fixed effects. Regression coefficients and standard errors (in parentheses) are reported. In Column 1 we trim the bottom and top 1% of observations with the lowest and highest values of economic uncertainty. In Column 2, we repeat the same exercise, excluding the bottom and top 5%. In Column 3 (4), we trim the bottom and top 1% (5%) of observations with the lowest and highest values of cardiovascular disease deaths.
