### Supplementary material 3

**Table S3**

**Estimated ratio of women asking for EC at different time points after unprotected sex**

Percentage of women asking for EC after unprotected sexual intercourse at predefined time points. Pharmacists estimated percentage of women (sum = 100%, 0% not depicted) for each given interval; n=527 responded, with additional 25 invalid answers (sum ≠ 100%).

<b>Ratio of women asking for EC at different time ranges after unprotected sex</b>				
<b>Time (h)</b>	<b>Respondents (n)</b>			
<b>&lt;12</b>	177	135	135	17
<b>12-72</b>	166	156	144	42
<b>72-120</b>	100	2	1	0
<b>&gt;120</b>	3	0	0	0
	<b>25%</b> (of women)	<b>50%</b> (of women)	<b>75%</b> (of women)	<b>100%</b> (of women)
