Table S2: P-values for the comparison of human mobility before and during the declaration of a state of emergency using the Wilcoxon signed-rank test, by age groups and time frames, and by the first and second declaration. The ratios of the rolling seven-day daily average of the total population to a baseline on January 16, 2020, were compared between during the declaration of a state of emergency and during the same period before the declaration.

Declaration	Time frame	Area	Prefecture	Median ratio (before and during the emergency declaration: B, D) by age group											
				B, D	20s	B, D	30s	B, D	40s	B, D	50s	B, D	60s	B, D	≥ 70s

Table S3: P-values for the comparison of human mobility among age groups using the Kruskal-Wallis test, by time frames and by the first and second declaration of a state of emergency. The ratios of the rolling seven-day daily average of the total population to a baseline on January 16, 2020 during the declaration of a state of emergency was compared among age groups.

Declaration	Time frame	Area	Prefecture	Median ratio by age group

Table S4: P-values for testing zero cross-correlation across all maximum +10-day lags between human mobility and daily number of newly reported COVID-19 cases during the declaration of a state of emergency, using the Haugh-Box test, by age groups and time frames, and by the first and second declaration. The ratios of the rolling seven-day daily average of the total population to a baseline on January 16, 2020, was compared with daily number of newly reported COVID-19 cases during the declaration of a state of emergency.

Figure S1: A map showing the location of the 35 areas. For simplicity of the map, all areas in the same prefecture are combined into the same plot. This map is based on the Digital Map 25000 (Map Image) published by Geospatial Information Authority of Japan (Approval No.603FY2017 information usage <<http://www.gsi.go.jp>>).

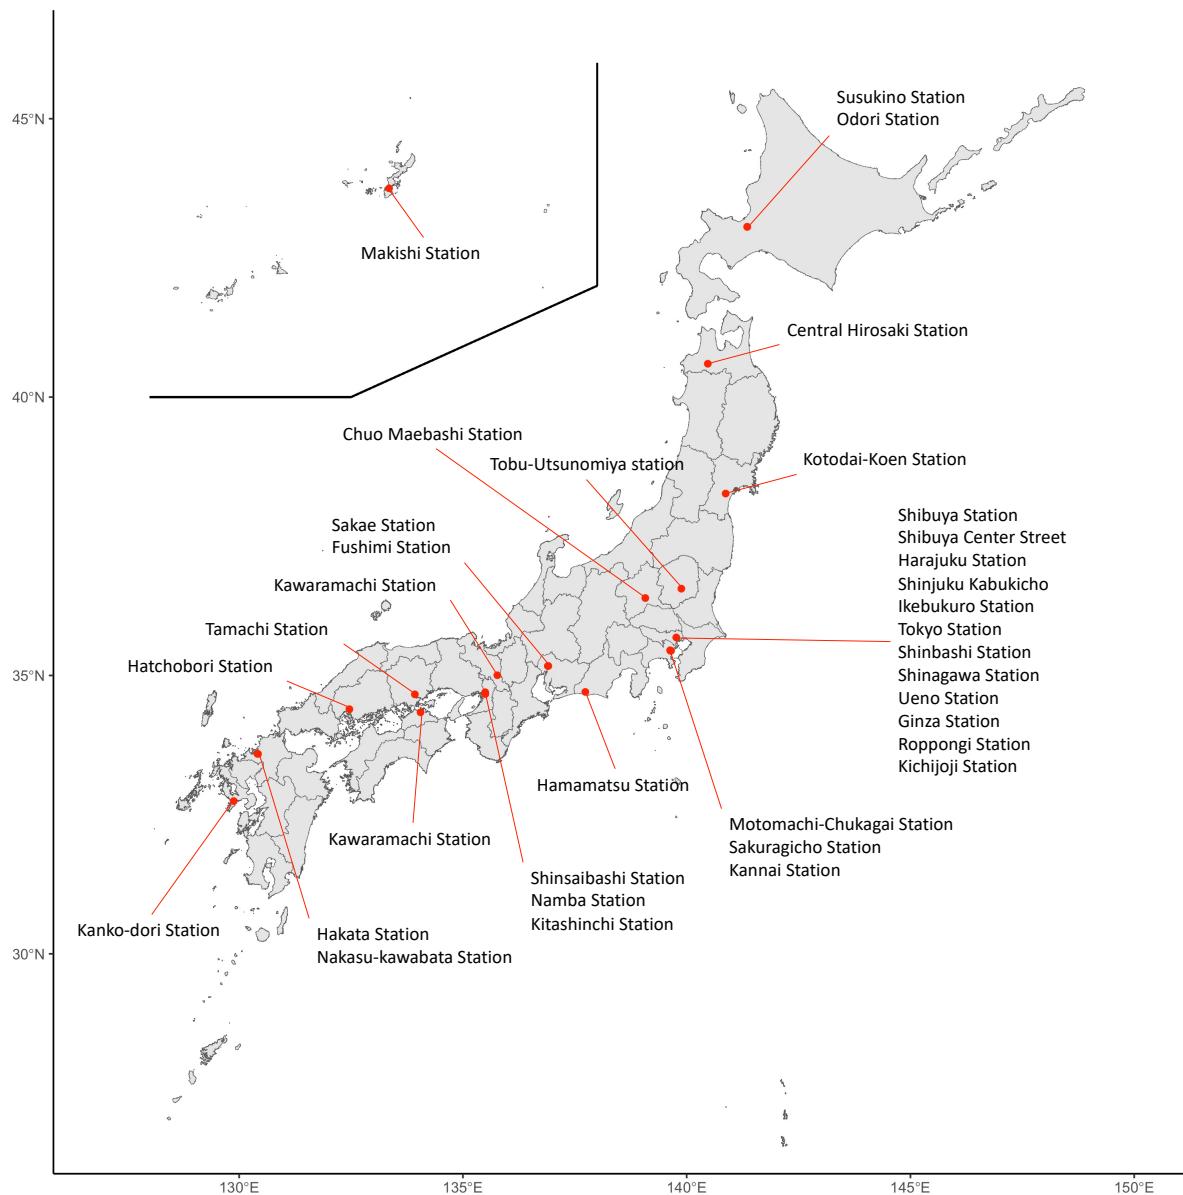

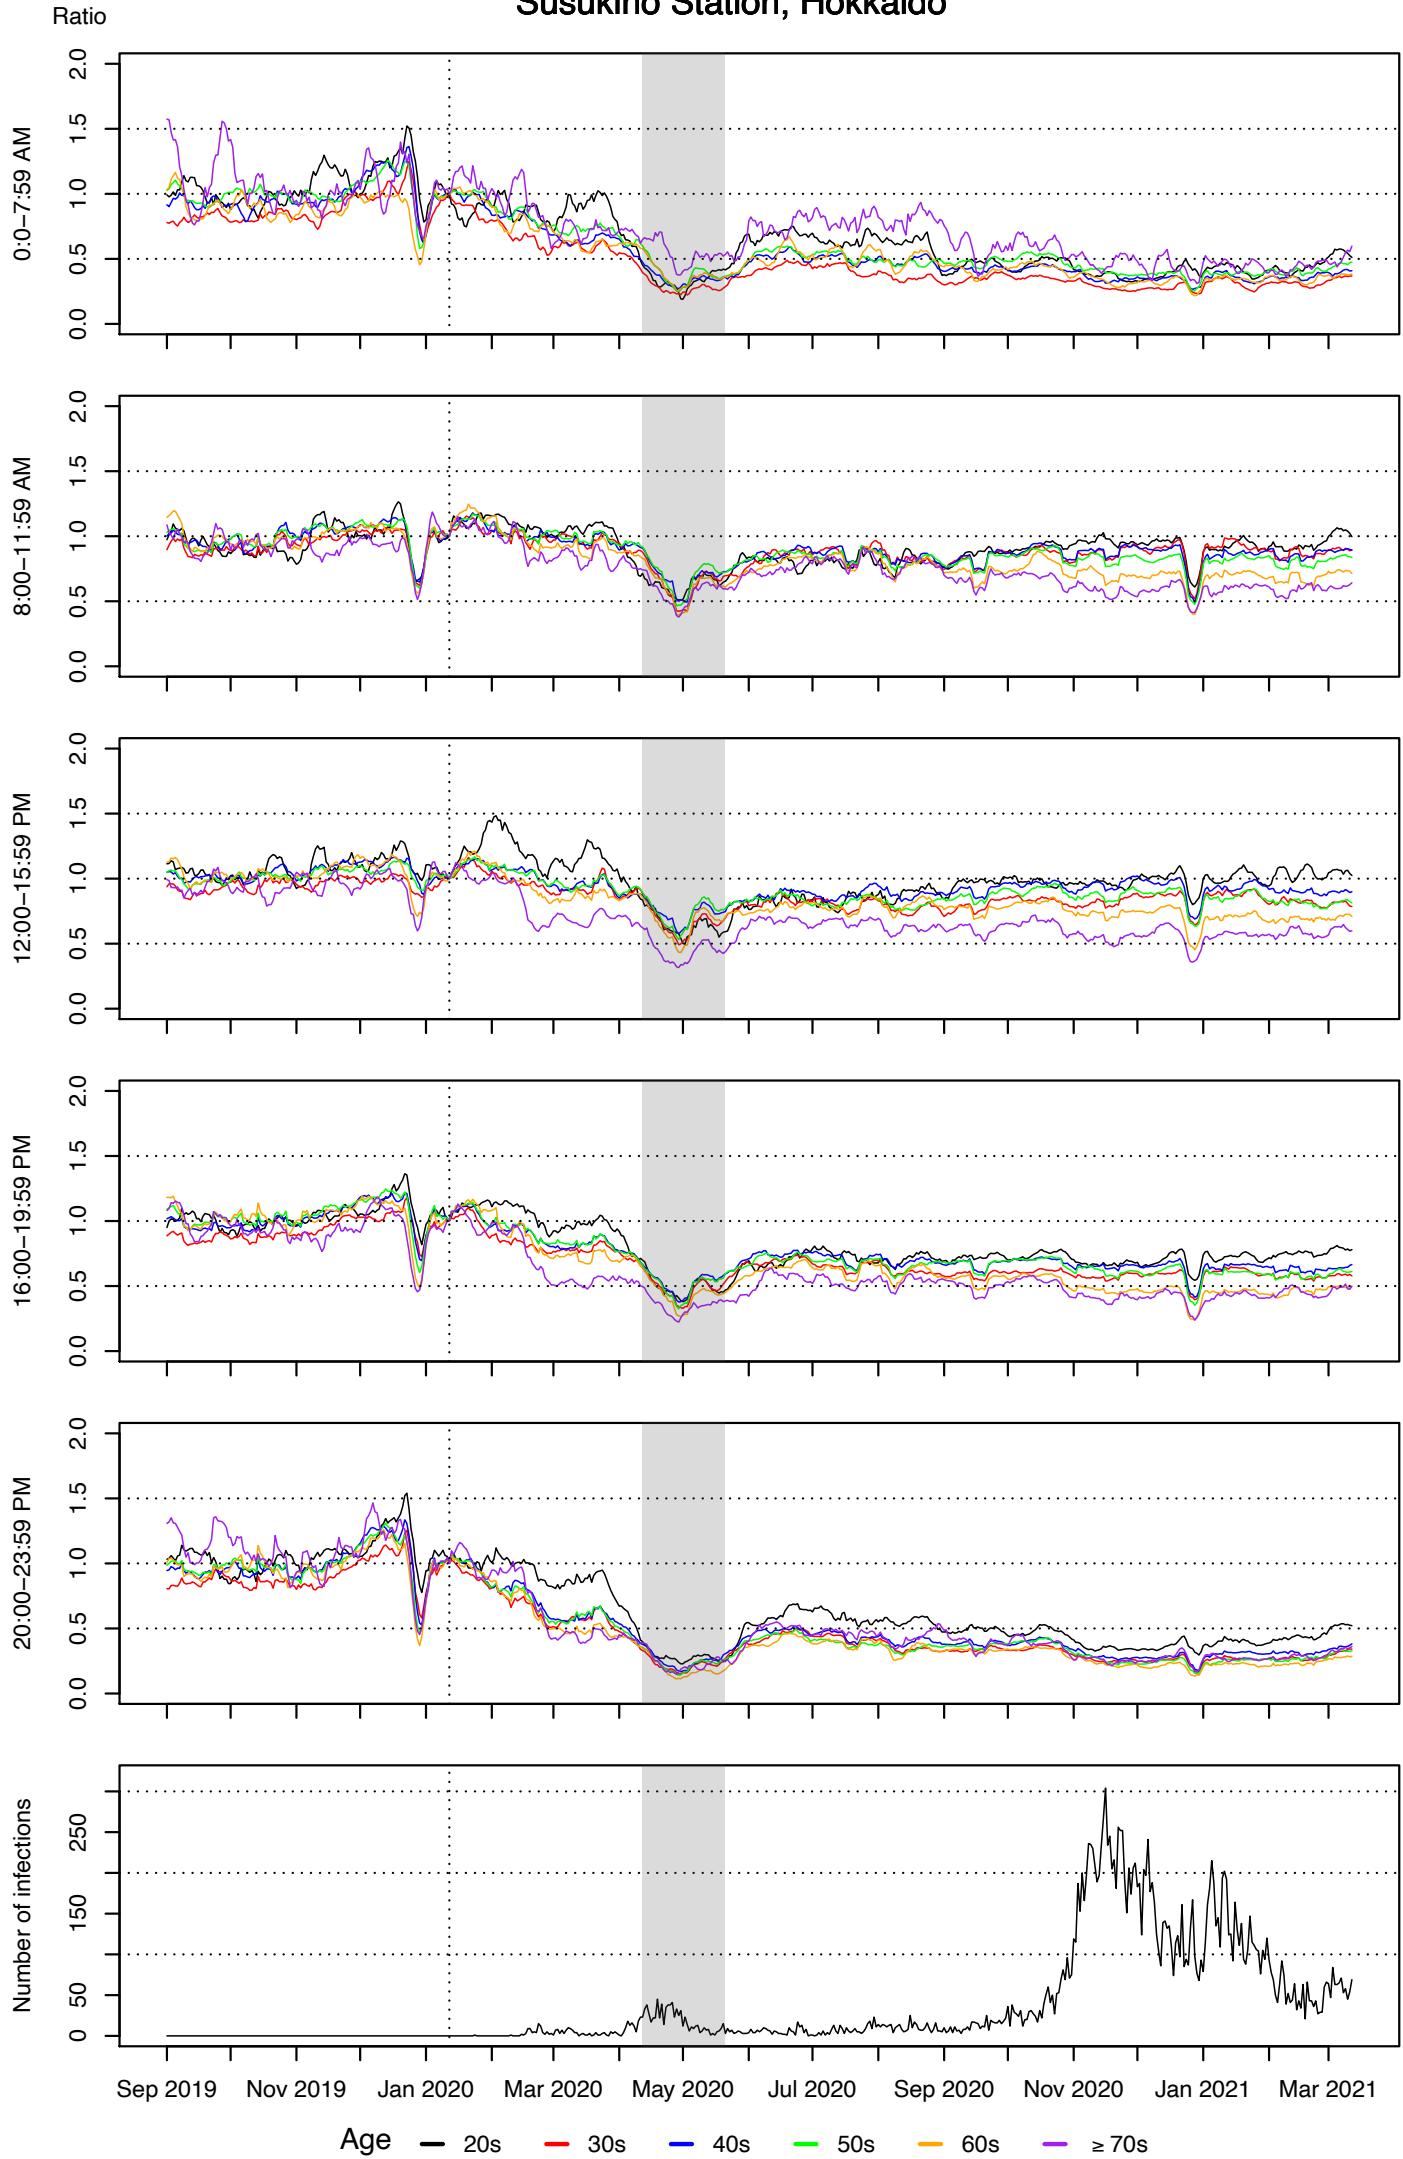

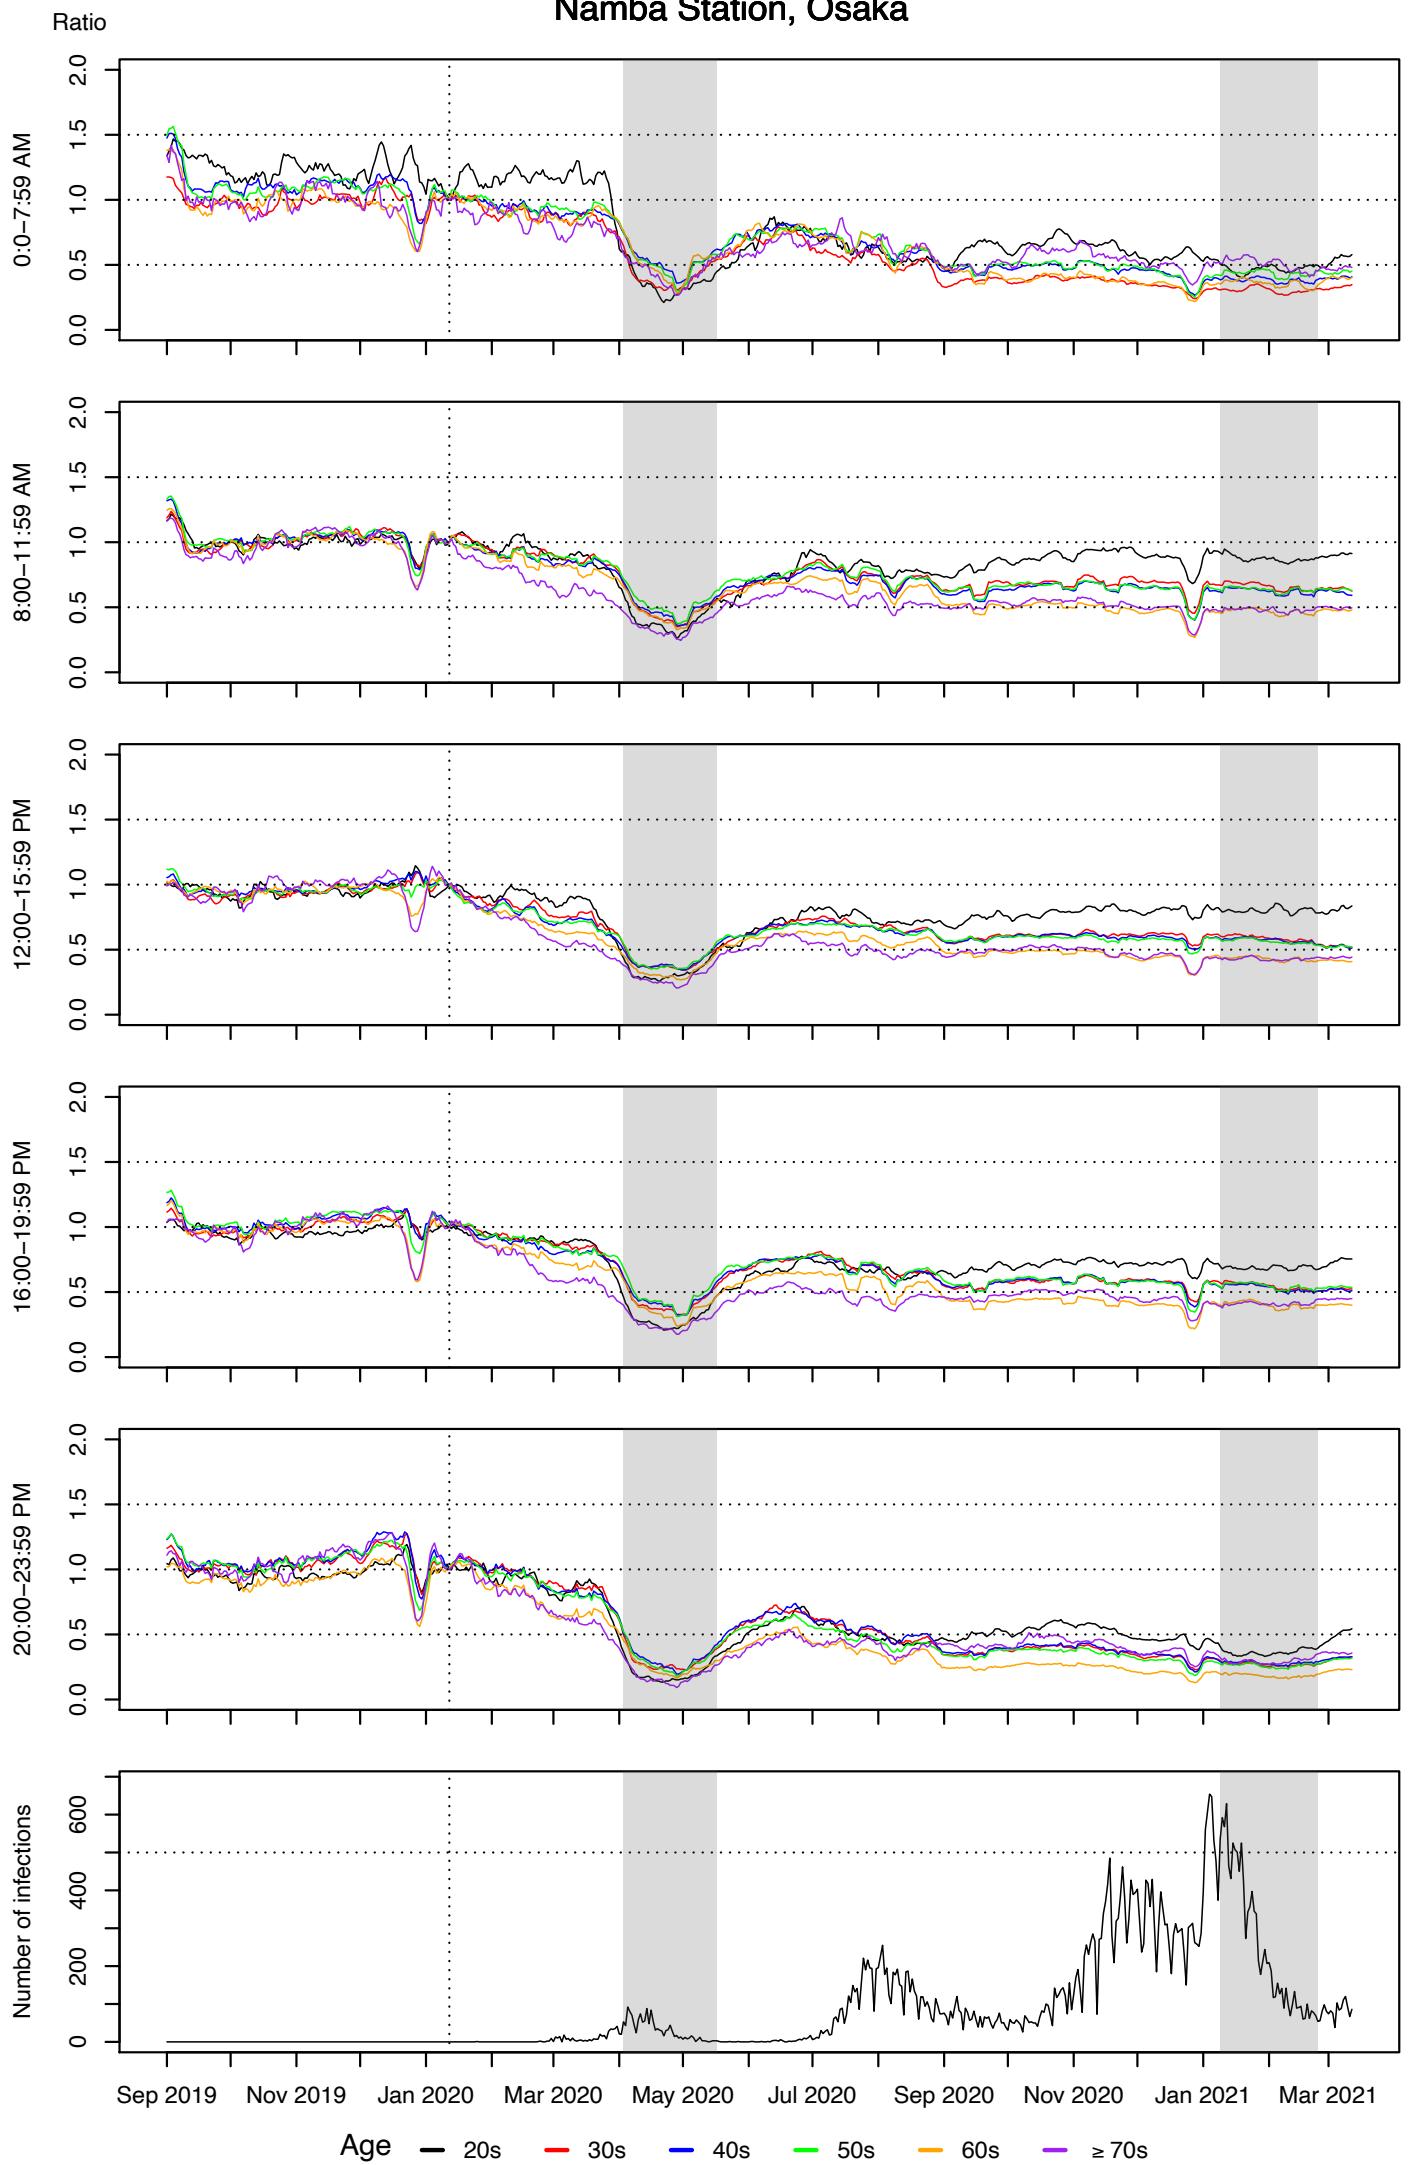

Figure S2: Temporal trends in human mobility by age groups and time frames in other areas. The top five graphs show the ratio of the rolling seven-day daily average of the total population based on different time frames, and the last one is a graph of the daily number of newly reported COVID-19 cases. Gray areas indicate a state of emergency.
