

Supplemental Table 3

Odds ratios for death at 12 months including the 35 patients with missing information on preadmission independence status (total n=1882). The model includes age, sex, WFNS grade, significant comorbidities, modified SAPS and admission year. Age and modified SAPS were included as continuous variables.

	OR	95 % CI
Age	1.05	1.04-1.06
Sex		
Male	Ref	
Female	0.65	0.50-0.86
WFNS grade		
I-III	Ref	
IV-V	6.27	4.50-8.74
Comorbidity		
No	Ref	
Yes	1.35	0.85-2.14
Modified SAPS II	1.15	1.13-1.18
Admission year		
2003–2008	Ref	
2009–2014	0.78	0.56-1.08
2015-2019	0.94	0.66-1.32

OR: odds ratio, SAPS: Simplified Acute Physiology Score, WFNS: World Federation of Neurological Surgeons
