

Supplemental Table 4

Odds ratios for death at 12-month in WFNS grade subgroups. The model includes age, sex, preadmission independence status, significant comorbidities, modified SAPS and admission year. Age and modified SAPS were included as continuous variables.

	WFNS grade I-III (n=970)		WFNS grade IV-V (n=877)	
	OR	95 % CI	OR	95 % CI
Age	1.07	1.05-1.10	1.04	1.03-1.06
Sex				
Male	Ref		Ref	
Female	0.51	0.28-0.93	0.72	0.52-0.98
Preadmission status				
Independent	Ref		Ref	
Non-independent	1.26	0.43-3.70	1.60	0.87-2.93
Comorbidity				
No	Ref		Ref	
Yes	2.17	1.02-4.63	1.06	0.61-1.84
Modified SAPS II	1.11	1.06-1.16	1.16	1.13-1.19
Admission year				
2003–2008	Ref		Ref	
2009–2014	0.80	0.42-1.83	0.72	0.50-1.03
2015-2019	0.66	0.30-1.44	0.93	0.63-1.38
