

Diagnosis of Parkinson syndrome and Lewy-body disease using ^{123}I -ioflupane images and a model with image features based on machine learning

Nakajima K, et al.

Supplementary data

Putamen and caudate uptake determined by ROI-based calculation. Sizes and shapes of circles and ellipses can be changed if necessary. Putamen: caudate average count ratio significantly differs between comma and dot-like patterns (n = 137).

Samples of regions of interest in caudate and putamen

The boxplot denotes median and 1st and 3rd quartiles, and whiskers for value ranges. Mean line (green), error bar and standard deviation (blue).
