

ELECTRONIC SUPPLEMENTARY MATERIALS

Supplementary Figure 1. Prisma flow diagram detailing all articles identified during the first targeted literature review and the associated reasons for exclusion

Supplementary Figure 1. Prisma flow diagram detailing all articles identified during the second targeted literature review and the associated reasons for exclusion

Online Resource 1. A summary of all studies identified reporting rates of treatment persistence and compliance, separated by disease indication

Study	Treatment/Patient population	Type of study	Compliance	Persistence
AS				
Arends et al. <i>Arthritis Res Ther.</i> 2012;14(2):R98.	ETAN, INF, ADA: Total: 111	Prospective longitudinal observational cohort		X
Glintborg et al. <i>Ann Rheum Dis.</i> 2010;69(11):2002–8.	ADA: 247 (29%); ETAN: 150 (18%); INF: 445 (53%)	Retrospective review of clinical records		X
Glintborg et al. <i>Ann Rheum Dis.</i> 2013;72(7):1149–55.	ADA: 532 (37%); ETAN: 231 (16%); INF: 653 (45%); GOL: 20 (1%)	Retrospective review of clinical records		X
Gulyas et al. <i>Eur J Health Econ.</i> 2014;15(Suppl 1):S93–100.	Non-switchers: 98; Switchers: 77	Retrospective, single-center, observational		X
Kristensen et al. <i>Arthritis Care Res.</i> 2010;62(10):1362–9.	Spondylitis: 122; Peripheral arthritis: 121	Prospective, observational study cohort		X
Lie et al. <i>Ann Rheum Dis.</i> 2011;70(1):157–63.	Non-switchers: 437; Switchers: 77	Longitudinal observational multicenter		X
Luc et al. <i>J Rheumatol.</i> 2007;34(10):2078–81.	INF: 74; ETAN: 72; ADA: 29	Retrospective, observational study in a single-center tertiary-referral clinic		X
Nell-Duxneuner et al. <i>Clin Pharmacol Ther.</i> 2012;50(12):867–72.	ETAN: 123; INF: 154; ADA: 62	Retrospective		X
Pavelka et al. <i>Clin Exp Rheumatol.</i> 2009;27(6):958–63.	INF, ADA, ETAN: Total: 310	Registry study		X
axSpA				
Gulfe et al. <i>Scand J Rheumatol.</i> 2014;43(6):493–7.	INF: 25; ETAN: 53; ADA: 23; GOL: 8; CZP: 3	Prospective		X
CD				
Billioud et al. <i>Inflamm Bowel Dis.</i> 2011;17(1):152–9.	ADA: 108	Observational multicenter	X	
Carter et al. <i>Adv Ther.</i> 2011;28(8):671–83.	INF: Adherent: 466; Non-adherent: 172	Retrospective database	X	
De Bie et al. <i>Aliment Pharmacol Ther.</i> 2010;33(2):243–50.	INF: 152	Observational Multicenter		X
Gonzaga et al. <i>Inflamm Bowel Dis.</i> 2009;15(12):1837–43.	Discontinued INF infusions 1 year: 42; Ongoing INF after 1 year: 112	Retrospective, observational		X
Kane et al. <i>Aliment Pharmacol Ther.</i>	INF: 274	Retrospective database	X	

2006;24(7):1099–103.				
Kane et al. Adv Ther. 2009;26(10):936–46.	INF: Adherent: 375; Non-adherent: 196	Claims data	X	
Nuti et al. J Pediatr Gastroenterol Nutr. 2014;58(5):582–7.	INF and ADA: 78	Retrospective, single-center, cohort		X
Stein et al. Inflamm Bowel Dis. 2010;16(7):1173–9.	INF: 104	Retrospective, observational	X	
IBD				
Desai et al. Inflamm Bowel Dis. 2013;19(2):309–15.	INF: 45; ADA: 9	Retrospective review of clinical records		X
Freling et al. Am J Gastroenterol. 2015;110(8):1186–96.	INF and ADA: 583	Retrospective single-center		X
Hiroz et al. Scand J Gastroenterol. 2014;49(10):1207–18.	CD: 956; UC: 775; indeterminate colitis: 40	Cohort		X
Tabibian et al. Dig Dis Sci. 2015;60(5):1366–74.	CD: 78; UC: 58	Cross-sectional	X	
Vahabnezhad et al. Inflamm Bowel Dis. 2014;20(4):606–13.	INF: 188 (CD: 157; UC: 31)	Single-center retrospective cohort		X
JIA				
McErlane et al. Rheumatology (Oxford). 2013;52(10):1905–13.	ETAN (49%); INF (28%); ADA (22%); ANA (1%)	Retrospective observational		X
Tynjala et al. Ann Rheum Dis. 2009;68(4):552–7.	ETAN: 105; INF: 104	Prospective, national, longitudinal, observational		X
PsA				
Chastek et al. Adv Ther. 2012;29(8):691–7.	ADA: 144; ETAN: 202	Retrospective review of clinical records		X
Fagerli et al. Ann Rheum Dis. 2013;72(11):1840–4.	Non-switchers: 344; Switcher 1 st TNFi: 95; Switcher 2 nd TNFi: 95	Longitudinal cohort		X
Fagerli et al. Ann Rheum Dis. 2014;73(1):132–7.	TNFi monotherapy: 170; TNFi combination: 270	Longitudinal observational		X
Glintborg et al. Rheumatolgy (Oxford). 2014;53(11):2100–9.	DANBIO registry: 376; ICEBIO registry: 86	Observational cohort		X
Glintborg et al. Arthritis Rheum. 2011;63(2):382–90.	ADA: 320; ETAN: 184; INF: 260	Retrospective review of clinical records		X
Glintborg et al. Arthritis Rheum. 2013;65(5):1213–23.	Biologics (ADA, ETAN, INF, GOL, RTX, TCZ, ABA): 1422	Observational cohort		X
Iannone et al. Scand J Rheumatol.	ADA-Polyarticular: 67; ADA-Oligoarticular:	Longitudinal cohort		X

2015;44(3):192–9.	37; ETAN-Polyarticular: 96; ETAN-Oligoarticular: 54; INF - Polyarticular: 50; INF-Oligoarticular: 24			
Kristensen et al. Ann Rheum Dis. 2008;67(3):364–9.	TNF α (ETAN, ADA, INF) with MTX: 161; TNF α without MTX: 100	Prospective observational		X
Saad et al. Arthritis Res Ther. 2009;11(2):R52.	ETAN: 316; ADA: 88; INF: 162	Observational		X
Saougon et al. Semin Arthritis Rheum. 2011;40(5):398–406.	INF: 30; ETAN: 25; ADA: 10	Open-label observational cohort		X
Zhang et al. Arthritis Res Ther. 2014;16(4):420.	Oral non-biologic DMARDs: 1698 (1217 received MTX); Biologic DMARDs: 3263	Retrospective		X
Zhu et al. Clin Ther. 2013;35(9):1376–85.	Biologics: 2143; Biologic + DMARD: 1021	Retrospective claims database		X
PsO				
Carrascosa et al. J Eur Acad Dermatol Venereol. 2014;28(7):907–14.	Biologics: 1162	Prospective inception cohort		X
Chastek et al. J Dermatolog Treat. 2013;24(1):25–33.	ADA: 330; ETAN: 497	Retrospective review of clinical records		X
Di Lernia et al. J Dermatolog Treat. 2012;23(6):404–9.	194 (ETAN, INF, ADA)	Retrospective observational		X
Esposito et al. Br J Dermatol. 2013;169(3):666–72.	ADA: 114; ETAN: 389; INF: 147	Retrospective analysis		X
Esposito et al. Drug Dev Res. 2014;75(Suppl 1):S31–4.	Total: 367: ETAN intermittent: 110 (72.4%); ETAN continuous: 42 (27.6%)	Retrospective analysis		X
Gniadecki et al. Br J Dermatol. 2011;164(5):1091–6.	ADA: 347; ETAN: 271; INF: 129	Retrospective claims database		X
Gniadecki et al. Br J Dermatol. 2015;172(1):244–52.	ADA: 567; ETAN: 364; INF: 176; UST: 170	Prospective cohort		X
Kim et al. J Am Acad Dermatol. 2015;73(2):237–41.	UST: 176; ETAN: 175; ADA: 134; INF: 60	Multicenter retrospective chart review		X
Lopes et al. Rev Saude Publica. 2014;48(4):651–61 (discussion 61).	ADA: 14; EFA: 43; ETAN: 35; INF: 111	Descriptive cross-sectional		X
Luber et al. J Am Acad Dermatol. 2014;70(3):525–32.	INF: 93	Retrospective cohort		X
Piaserico, S et al. J Am Acad Dermatol. 2014;70(2):257–62.e3.	5423 identified; 4389 with data; 228 switch to 2nd TNF α ; complete follow-up data for 105 (n=105 for outcomes)	Prospective, observational, cohort		X
Svedbom et al. J Eur Acad Dermatol	Biologics: 506	Database analysis		X

Venereol. 2015;29(2):215–23.				
van den Reek et al. Br J Dermatol. 2014;171(5):1189–96.	ADA: 101; ETAN: 82; UST: 66	Prospective registry		X
RA				
Agarwal et al. J Rheumatol. 2008;35(9):1737–44.	Not using a TNFi: 419; Using a TNFi: 503 (ETAN: 304; INF: 71; ADA: 128)	Prospective, observational, single-center cohort		X
Blom et al. J Rheumatol. 2009;36(10):2171–7.	Non-responders: 49; Loss of response: 75; AEs: 75	Observational registry		X
Bluett et al. Rheumatology (Oxford). 2015;54(3):494–9.	TNFi (ETAN, ADA, CZP, GOL): 392	Observational cohort	X
