Figure S1. Participant disposition

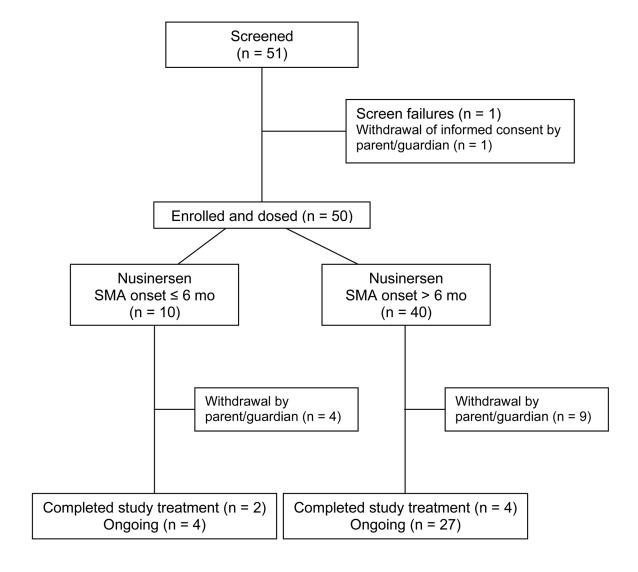

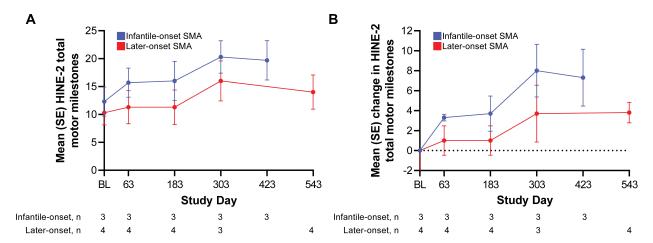

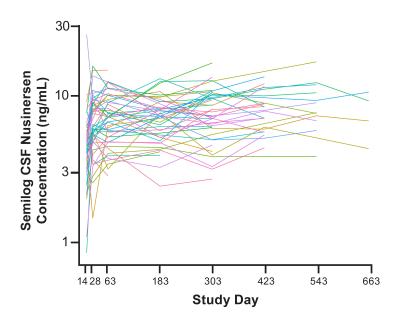

Figure S2. Gradual improvement was observed in mean (SD) HINE Section 2 total motor milestone scores of participants with full study data, **A)** total motor milestone score and **B)** change from baseline over time

BL baseline, *HINE* Hammersmith Infant Neurological Examination, *SMA* spinal muscular atrophy

Figure S3. Individual time-dependent CSF trough concentrations of nusinersen at planned study day visits for overall participants (n = 50)

CSF cerebrospinal fluid
