**ESM Table 2** Blood cells as percentage of the total cell numbers in wild-type and *hIL6<sup>tg</sup>* mice

<b>Blood cell type</b>	<b>Wild-type (%)</b>	<b><i>hIL6<sup>tg</sup></i> (%)</b>
Lymphocytes	70.4	72.4
Neutrophils	20.7	20.6
Basophils	3.7	1.7
Monocytes	5.1	5.1

Differential numbers of monocytes, neutrophils, monocytes and lymphocytes were determined on blood smears

Results are expressed as percentage of total cell number ( $n=7$  from each genotype)
