

ESM Table 3: Clinical characteristics of patients in the longitudinal treatment discontinuation study compared with the entire cohort of patients with GCK-MODY. This shows that those patients followed-up are representative of the entire cohort.

Clinical Characteristic	In Longitudinal therapy discontinuation cohort	In those without follow-up data	p-value
Age	Median = 27 (IQR 11, 32) (n=16)	median = 27 (IQR 13, 40) (n= 1030)	p=0.3
BMI (child values corrected to adult equivalent)	Median = 22.4 (20.6, 26.5) (n=9)	No follow up: n=527 median 23.5 (21.2, 26.3)	p=0.7
Age at diagnosis	Median 14 (9, 25) (n=15)	Median 20 (12, 31) (n=805)	p=0.1
Sex	6/16 males	451/1113 males	p=0.8
