

**Supplement 1. Comparison of characteristics of patients analyzed in this study and all TRACE-CORE participants**

**Table S1-1. Patient characteristics for this study (N=787) and the full TRACE-CORE population (N=2174): TRACE-CORE, 2011-2013**

Characteristic	This Study (N = 787)	Full TRACE-CORE population (N = 2174)
Age (mean, y)	62.0	61.3
Female (%)	29.9	33.5
Non-Hispanic white (%)	94.9	81.0
Education		
≤High school	36.3	46.5
Some college	30.6	28.9
≥College graduate	33.0	24.7
Live Alone	20.1	21.9
Low Health Literacy	29.0	36.1
Heavy Drinker	9.4	9.6
Current Smoker	20.6	23.3

The statistics for patient characteristics for all the TRACE-CORE participants were calculated by using information from a published TRACE-CORE paper.<sup>1</sup>
