

## Additional file 6: Penalized regression methods

Note: in the figures two vertical lines represent the following values of  $\lambda$ : a) the value that minimizes the cross-validation MSE ( $\lambda_{min}$ ); b) the maximum value within one standard error of the  $\lambda_{min}$  ( $\lambda_{1SE}$ ). The numbers at the top axis show the number of non-zero regression coefficients for every value of  $\lambda$ ; which corresponds to the number of variables retained in the model.

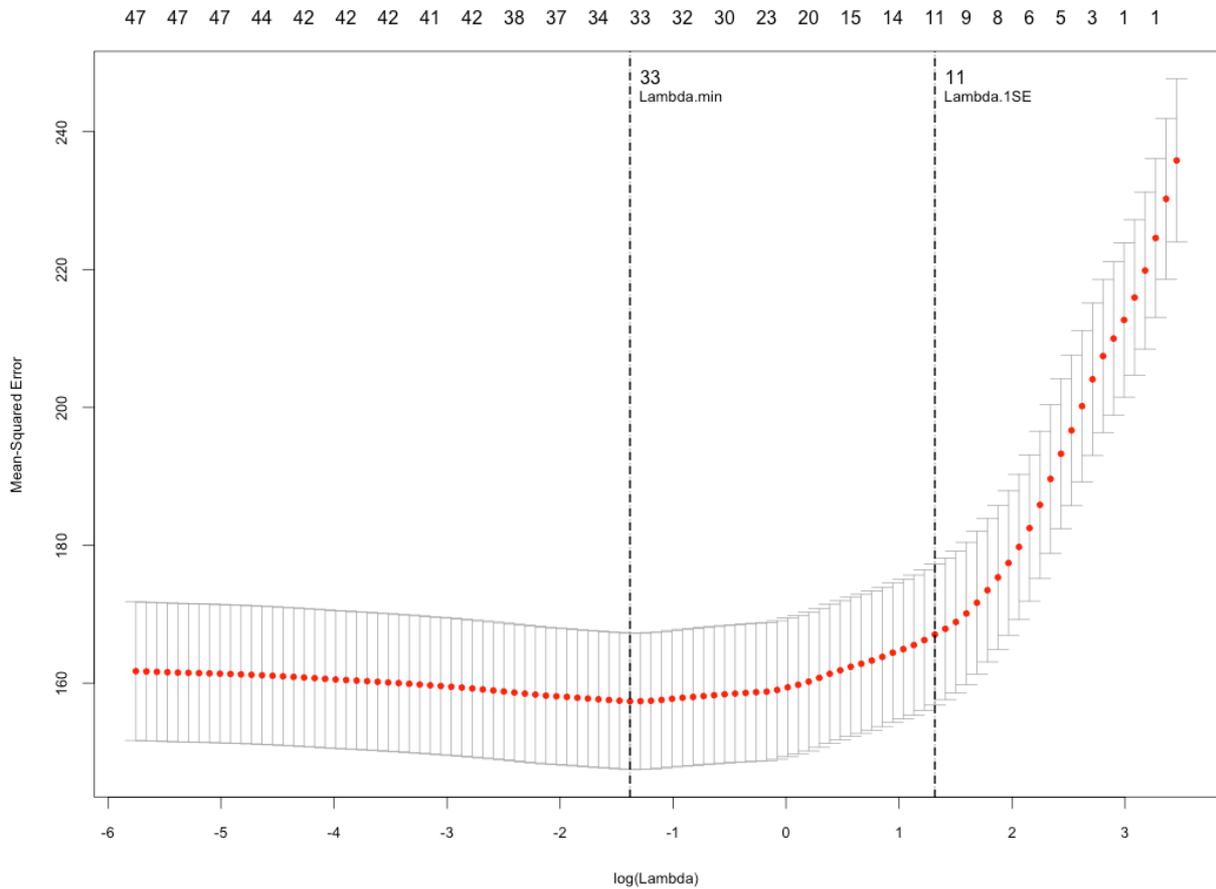

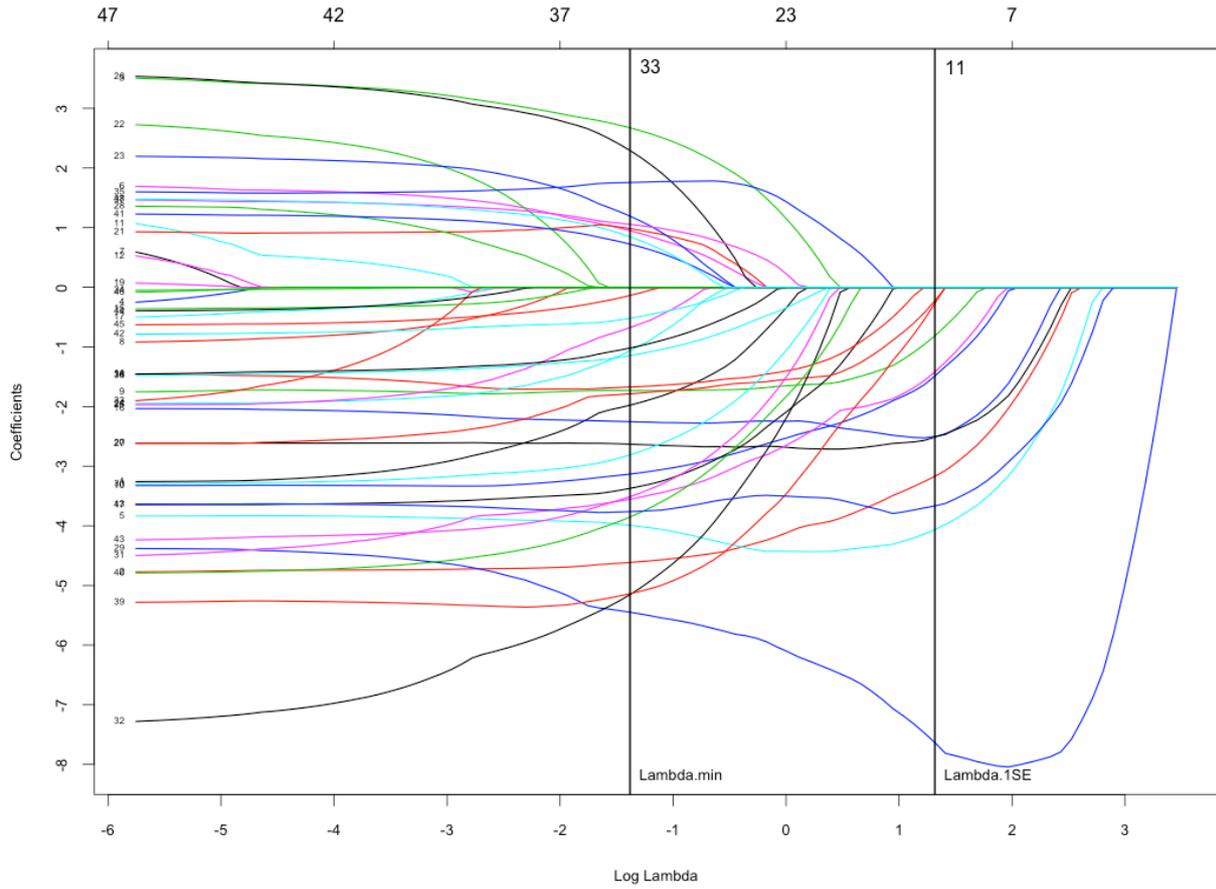

Figure S6.1: Lasso coefficients path and results of cross-validation

**Table S6.1: Lasso coefficients, 95% confidence intervals and inclusion probabilities***Note: Inclusion frequency is estimated using bootstrap.*

Variables	Lasso: $\lambda_{min}$			Lasso: $\lambda_{1SE}$
