I would like to ask you some questions about your experience during childbirth and how you and your baby have been since then. You may find some of these questions very personal. However, your answers are crucial for helping to understand the condition of women in Ghana.

Let me assure you that your answers are completely confidential and will not be told to anyone, and no one else in your household will know that you were asked these questions. If I ask you any questions you don't want to answer, just let me know and I will go on to the next question.

MISTREATMENT

Some women tell us when they give birth they are mistreated, or treated with disrespect while in the hospital. We would like to know how common this problem is, so we would like to ask you your own experiences with childbirth. There are no right or wrong answers to these questions. It is only important to us that we understand your experiences. Nothing you tell us will be linked to your name, your children's names, or the ability of you or your family members to access health care in the future.

Some of these questions may be upsetting or stressful. As I said before, you can skip any question you are not comfortable answering, and you can stop the interview at any point.
