

CV

gp. I: Normal control

healthy
hepatocytes

less congestion
P.T.

gp IV: Silymarin after TAA

gp.II: TAA

portoportal bridging

necrotic hepatocytes

Gp. III: Silymarin during TAA

granular
hepatocytes

gp. V: *S.mansoni* infected mice.

BD
some
inflammatory
R.S.

gp.VI: Praziquantel after Schistosomaisis

adult worm
in P.T.

gp. VII: Silymarin during schistosomaisis

dilated P.T. &
proliferation in ducts of
vessels due to
helminthic R.S.

gp. VIII: Silymarin after schistosomaisis

normal hepatocytes &
few inflammatory R.S.
in P.T.

necrotic hepatocytes
with fatty changes
due to ethanol effect

gp X: Ethanol

few inflammation
in sinusoidal tract

gp XI: silymarin during ethanol .

congested
ca

gp XII: silymarin after ethanol
