Dear Parent,

We are surveying the families of all our patients who have received liquid diet treatment for Crohn's disease in the last year. We are doing this for two reasons: to find out how it went and how successful it was; and to look at how people would feel about a possible solid food alternative diet we are trying to design.

We have included two copies of a questionnaire as well as a stamped addressed envelope. One questionnaire is for a parent/carer and the other for the child/young person to complete **themselves**. Both are very similar, but we are interested in whether children and their families have similar or different views on liquid diet for Crohn's disease.

We would be very grateful if you could have both questionnaires completed and then return them to us in the envelope provided. If you have any additional comments, please make them at the end of the survey or on the blank reverse of the last page. If you have any questions about the survey, please feel free to contact the IBD team on: ##### ## ## ## ##.

Thanks for taking the time to read and respond to this survey. We would be extremely grateful if replies could be submitted by 1<sup>st</sup> May.

Best wishes,
