

Timeline	Nurse-Led Intervention								
Training	(A)	(B)							
Recruitment	C								
Baseline (T1)	D								
Intervention	E								
2 weeks	F	G	H	K	M				
1 month	I	O							
2 months	I	F	G	J	K	L	N	M	O
3 months	I	F	G	H	J	K	L	M	O
4 months	I	F	G	J	K	L	M	O	
5 months	I	F	G	J	K	L	M	O	
6 months	I	F	G	H	J	K	L	M	O
	P								
6 months (T2)	Q								
12 months (T3)	R								
(A)	Training (3 days) of RNs in prevention, recognition and management of depression and problem-solving therapy								
(B)	Training (3 days) of PSWs in prevention, recognition and management of depression and problem solving therapy								
C	Recruitment of study participants by CCAC Case Manager								
D	Completion of informed consent by client and completion of baseline (T1) pre-test questionnaires via in-home interview by Research Assistant								
E	Assignment of all eligible and consenting study participants to the Nurse-Led Intervention								
F	RN screens client for depressive symptoms using the GDS-15								
G	PSW screens client for depressive symptoms using the GIP-28								
H	RN screens for depression risk factors using standardized screening tools (CAM, SMMSE, SCREEN II, GAD-7)								
I	RN conducts case conference with PSW to discuss assessment findings and develop plan of care								
J	RN identifies and addresses depression risk factors using depression risk management protocol								
K	RN assesses client's problem-solving abilities and provides problem-solving counselling								
L	RN and PSW provide social and behavioural activation								
M	RN supports antidepressant medication management in collaboration with clients and their PCP using evidence-based guidelines								
N	RN provides client with a package of written information about depression and treatment options								
O	RN alerts the PCP to the presence of depressive symptoms, dementia, delirium or medication issues and identifies and initiates referrals to other health services and supports								
P	Following completion of the 6-month intervention, the RN completes all documentation in the depression care booklet and the monthly visit and case conference records and sends it to the researchers								
Q	Completion of 6-month (T2) post-test questionnaires via in-home interview by Research Assistant								
R	Completion of 12-month (T3) post-test questionnaires via in-home interview by Research Assistant
