

Questionnaire

We are working on a research entitled knowledge, attitude, and practice and associated factors towards blood donation.

You have been selected to participate in this study. The finding of the study will be used for better planning and up on intervention towards blood donation concerning the awareness, perception and practice. Therefore we are requesting you to fill this questionnaire by yourself. There is no right or wrong answer. Your response is completely confidential. You do not need to write your name and will never be used in a connection with any of the information you will give. You are kindly requested to answer every question and may stop filling at any time if you want to do so. However, your honest answers to these questions will help us better understand what people think, say and do about the blood donation. According to the questions, there might have more than one answers.

WE would greatly appreciate your help in responding to these questions. The survey will take about 30 minutes to fill this questionnaire.

Are you willing to participate? Yes/ No

Please read each questions carefully and show your answer by circling the number and writing your response on blank spaces.

Thank you in advance for your participation!

Part I: Socio-demographic questions

101	Ageyears	
102	Sex	Male	Female
103	Marital status	Single	Divorced
		Married	Widowed
104	Qualification	Diploma	2 nd degree
		First degree	Specialist
105	Religion	Orthodox	
		Muslim	
		Catholic	
		Protestant	
		Others.....	
106	Duration of practice in the health facilityYears/.....Months
