Notes:												
				established surveillance: 3 and more surveys								
				beginning of surveillance: 2 surveys or one and the next planned								
				planned surveillance: first survey only								
Blank cells				no questionnaire returned								

The numbers in the cells relate to the number of different data sources used for behavioural surveillance in a population

Epi	Type of HIV epidemic: concentrated (C), low level (LL) (There are no HIV generalised epidemics in Europe)
BSS	Existence of a behavioural surveillance system (yes/no)
Start	Year of initiation of system
Gen Pop	Surveillance/surveys in general population (yes/no = reported existence of a system in this population)
Youth	Surveillance/surveys in youth, (yes/no = reported existence of a system in this population)
MSM	Surveillance/surveys in MSM men having sex with men, (yes/no = reported existence of a system)
IDU	Surveillance/surveys in intravenous drug users; (yes/no = reported existence of a system in this population)
SW	Surveillance/surveys in sex workers; (yes/no = reported existence of a system in this population)
STIp	Surveillance/surveys in STI clinic patients; (yes/no = reported existence of a system in this population)
PLWHA	Surveillance/surveys in people living with HIV/AIDS; (yes/no = reported existence of a system in this population)
Migr	Surveillance/surveys in migrants and ethnic minorities; (yes/no = reported existence of a system)
Other	Surveillance/surveys in other populations
