Certain regions of the protein sequences having highest dissimilarity between the two species are highlighted

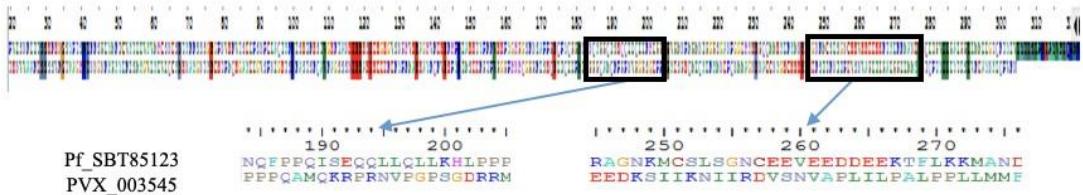

#### A. Pvstp1, putative (PVX\_094303)

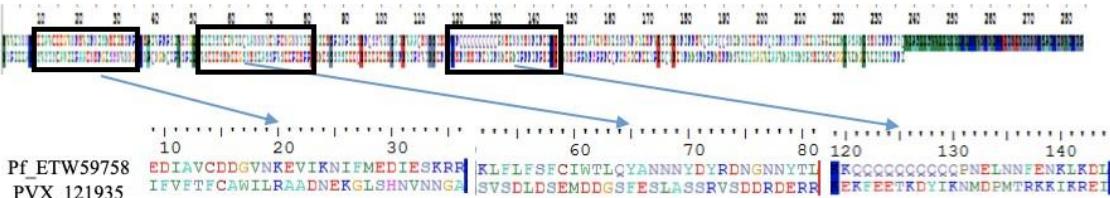

#### B. Plasmodium exported protein (PVX\_003555)

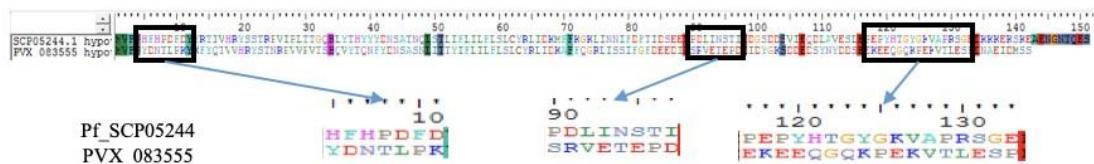

#### C. Plasmodium exported protein (PVX\_003545)

#### D. Plasmodium exported protein (PVX\_121935)

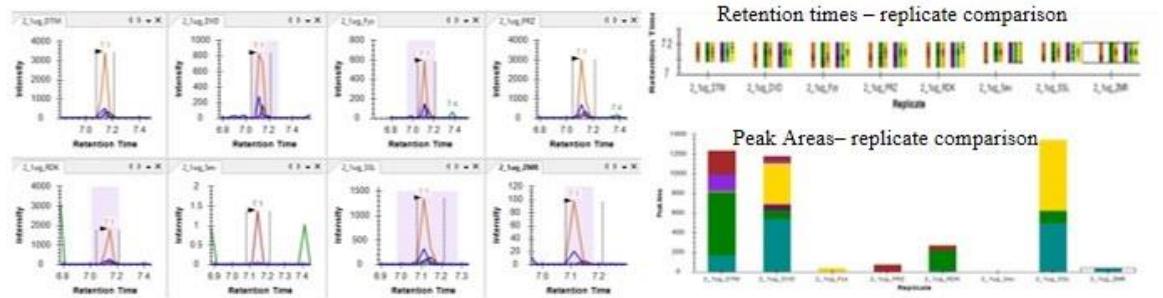

#### E. Hypothetical protein (PVX\_083555)

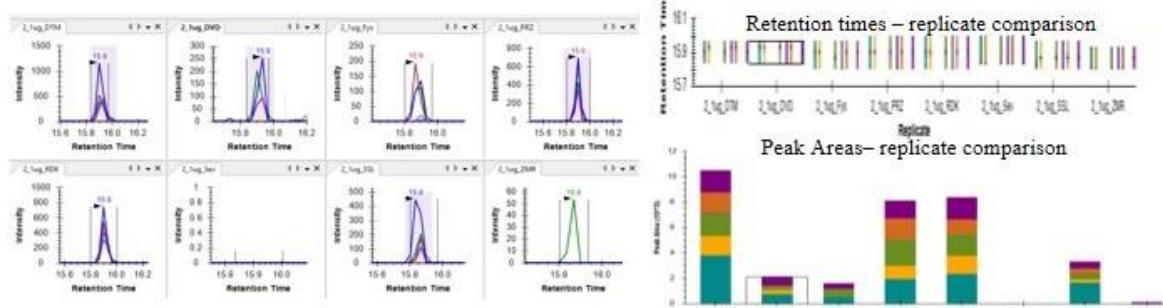

**Additional figure 3.** Standardization of peptide validation experiments using a targeted proteomics approach. The left panel shows a representative optimized MRM assay for sorted peptides. The top right panel shows the comparison of retention time in all the individual samples. The bottom left panel shows the comparison of Peak area in the plasma sample runs as Biological replicates. The experiment was performed for four peptides.
