

General information	
<b>Gene name:</b>	Succinate dehydrogenase complex, subunit D
<b>Gene symbol:</b>	<b>SDHD</b>
<b>Chromosome Location:</b>	11q22.3-23
<b>Database location:</b>	<a href="http://chromium.liacs.nl/lovd_sdh/">chromium.liacs.nl/lovd_sdh/</a>
<b>Curator:</b>	<a href="#">Dr. J.P.L. Bayley</a> and <a href="#">Peter E.M. Taschner</a>
<b>Date of creation:</b>	January 05, 2005
<b>Last update:</b>	<b>September 14, 2005</b>
<b>Version:</b>	<b>SDHD050914</b>
<b>Add allelic variant:</b>	<a href="#">Submit an allelic variant</a>
<b>First time submitters:</b>	<a href="#">Register here</a>
<b><a href="#">coding DNA reference sequence:</a></b>	SDHD reference sequence for describing allelic variants
<b>Total number of allelic variants:</b>	<b>116</b>
<b>Number of unique allelic variants:</b>	<b>50</b>
<b>NOTE:</b>	The allelic variants listed have been found in literature or were submitted directly to this database. When you notice any omissions or mistakes, please let us know (thank you). Disclaimer: Inclusion of sequence variants in the SDH mutation database does not imply that there is convincing evidence for pathogenicity.

#### Allelic variant tables

<b><a href="#">Complete allelic variant table:</a></b>	Listing of all allelic variants in the SDHD database
<b><a href="#">Summary tables:</a></b>	Summary of all allelic variants in the SDHD database, sorted by type of variant (with graphical displays and statistics)
<b><a href="#">Polymorphism table:</a></b>	Listing of all SDHD variants reported to have no noticeable phenotypic effect
