BMC Nephrology

Article: No increase in small-solute transport in peritoneal dialysis patients treated without hypertonic glucose for fifty-four months.

Dominique Pagniez, Alain Duhamel, Eric Boulanger, Celia Lessore de Sainte Foy, Jean-Baptiste Beuscart

S-Table 1: Covariance parameters derived from the linear mixed model fitted on the whole data from inclusion to end of follow-up. In this model, we considered a linear and quadratic time effect as well as a random intercept, a random linear and quadratic time effect.

	Intercept	Time	(Time) ²
Intercept	0.00616269	-0.00157265	0.00014259
Time		0.00100794	-9.58505E-05
(Time) ²			9.41376E-06
