## SUPPLEMENTAL MATERIALS

Supplemental Figure 1. Overall study design

Supplemental Figure 2. Veverimer Effect on Composite Endpoint at Treatment Week 52

|  | Proportion of Patients Meeting Endpoint |  | PlaceboSubtracted Proportion (\%, 95\% CI) | P Values |
| :---: | :---: | :---: | :---: | :---: |
|  | Veverimer | Placebo |  |  |
| - Female Subjects | 29 (66\%) | 11 (36\%) |  | $\mathrm{P}=0.0110$ |
| - Male Subjects | 40 (61\%) | 14 (40\%) |  | $\mathrm{P}=0.0492$ |
|  |  | -20-10 | 1020304050 | $08090100$ |
|  |  | cebo Bette | Veverime |  |

Supplemental Table 1．Kidney Disease and Quality of Life－Physical Function Domain

| 3．The following items are about activities you might do during a typical day． Does your health now limit you in the activities？If so，how much？ ［Mark an $\mathbf{s}_{\mathrm{B}}^{\mathrm{in}}$ a box on each line．］ |  | Yes，limited a lot $\square$ | Yes，limited a little $\square$ | No，not limited at all |
| :---: | :---: | :---: | :---: | :---: |
| a | Vigorous activities，such as running，lifting heavy objects，participating in strenuous sports | 区 | 区 | 区 |
| b | Moderate activities，such as moving a table，pushing a vacuum cleaner， bowling or playing golf． | 区 | 区 | 区 |
| c | Lifting or carrying groceries | 区 | 区 | 区 |
| d | Climbing several flights of stairs | 区 | 区 | 区 |
| e | Climbing one flight of stairs | 区 | 区 | 区 |
| f | Bending，kneeling，or stooping | 区 | 区 | 区 |
| g | Walking more than a mile | 区 | 区 | 区 |
| h | Walking several blocks | 区 | 区 | 区 |
| i | Walking one block | 区 | 区 | 区 |
| J | Bathing or dressing yourself | 区 | 区 | 区 |
