PERART study initial random sample: 3010 sbj >50 years (23):

- Frammingham/REGICOR functions calculation
- AAI measurement

ASIA sample: 1503 sbj meeting criteria:

- REGICOR>5 or Frammingham>10
- No history of CD/stroke
- No disability

Recruitment phase: phone contact (up to five calls in each patient) to accept participation in baseline visit at our centre.

Baseline visit: Reassessment of inclusion criteria and signing of informed written consent
