

EXISTING LEVEL OF CARE & MAGNITUDE OF THE PROBLEM

Step I: Retrospective review: Gap analysis

1. Identify areas of unmet need
2. Describe the pattern of the problem
3. Identify underlying factors for the gaps

Step II: Implementation

1. Select required interventions: *what should be done?*
2. Set priorities for improvement: *what can be afforded?*
3. Plan for sustainability of the program and achievements: involve all stakeholders
4. Set order of implementation
5. Implement the set of interventions according to the agreed order

Step III: Monitoring and Evaluation

1. Develop evaluation work plan
2. Determine regularly the implementation successes, constraints and recommend on the way forward.

EXPECTED LEVEL OF PREGNANCY CARE & OUTCOME
