 recognition/management Family planning counseling and provision Essential vaccinations Management of childhood illnesses (pneumonia, diarrhea, malaria, malnutrition) 	O O		OOO OOO	··· O-· O- O-····

Key: = interaction

e = delivery of intervention

- * These example interventions are a subset of the full set of 30 needed interventions between pregnancy and 28 days of birth (excludes unpredictable curative interactions)
- ** Can also occur during different visits throughout antenatal period, and promotion of breastfeeding can occur at any interaction
