

Patients with up to 5 metastatic lesions meeting inclusion criteria

Informed consent obtained

RANDOMIZATION

(1:2 ratio of randomization to Arm 1 vs. Arm 2)

ARM 1: STANDARD OF CARE

Palliative radiation therapy if indicated
Further chemotherapy at discretion of medical oncologist

FOLLOW-UP

Clinical follow-up every 3 months with quality of life measurement.

CT and bone scan at 3 and 6 months, then every 6 months until progression

ARM 2: SABR

SABR to all sites of known disease
Further chemotherapy at discretion of medical oncologist

FOLLOW-UP

Clinical follow-up every 3 months with quality of life measurement.

CT and Bone Scan at 3 and 6 months, then every 6 months for SABR salvage of new lesions
