

IDENTIFIED (GP-listed) patients aged 18 years or more with a first-time diagnosis of cancer recorded in the Danish National Patient Registry and a verified diagnosis in the Danish Cancer Registry as of 2011.

N = 7,562

No response from GP 1,981 (26.2%)

RESPONDENTS: Validated patients for whom the GP responded (% of validated patients).

N = 5,581 (73.8%)

Exclusion (total)	1,480	(26.5%)
- No GP involvement in diagnosis	1,130	(20.4%)
- National breast cancer screening case	343	(6.1%)
- Male breast cancer patient	7	(0.1%)

STUDY POPULATION: proportion of respondents with GP involvement in diagnostic and complete data.

N =4,101 (73.5%)

Missing data (total)	278	(6.8%)
- Missing data - symptom interpretation	146	(3.6%)
- Missing data - CPP referral	7	(0.2%)
- Missing data - diagnostic interval	125	(3.0%)

STUDY SUBJECTS: proportion of study population

N =3,823 (93.2%)
