

Patient Diagnosed with MIBC. Medical Oncology Referral for All Patients.

Candidate for Cisplatin-based Neoadjuvant Chemotherapy

Patients with CrCl ≤ 60 mL/min/1.73², poor performance status, or heart disease. Poor candidate for cisplatin-based therapy (RCT needed).

Consider Split-Dose Cisplatin

Thorough discussion with patient. Level 1 Evidence for MVAC or CMV. No RCT data comparing regimens

Radical Cystectomy

Organ Confined Disease

pT3, N+ disease or higher

Close Follow-Up

Potential candidate for systemic therapy through EAU guidelines do not recommend further treatment because sufficient data is lacking^{39,45}.
