

Participation in Clinical Trials

This next section asks about your experiences with taking part in clinical trials. A clinical trial is a research study where participants are assigned by chance (randomly) to receive the new treatment or usual treatment. Please circle the number that best describes your answer.

- B1. Since your cancer diagnosis, have you been asked to take part in a clinical trial?**
- 1 Yes
2 No (*go to Section C on the next page*)
-

- B2. What was the clinical trial about?**
Please circle all that apply
- 1 Surgical treatments
2 Radiation therapy treatments
3 Chemotherapy treatments
4 Complementary or natural therapies
5 Psychological well being
6 Can't remember
7 Other (please specify) _____
-

- B3. Did you choose to participate in the clinical trial?**
- 1 Yes
2 No (*go to Question 5*)

(If you have been asked to participate in more than one trial, please think about the last trial you were invited to take part in when answering)

- B4. Now that you think back, would you agree to take part in the clinical trial again?**
- 1 Yes (*go to Question 6*)
2 No (*go to Question 6*)
3 Not sure (*go to Question 6*)

Please circle one number only

- B5. Why didn't you want to participate in the trial?**
- 1 I do not like the idea of clinical trials
2 I wanted to choose my treatment
3 I did not understand what it involved
4 I was worried about the risks/side effects
5 My loved ones did not want me to
6 Other (please specify) _____
-

- B6. Imagine that you are participating in a clinical trial and a new trial comes up that you could participate in as well. What should happen?**
- 1 I should not be asked about the second trial
2 The researcher should check if my doctor thinks I should participate in the trial before discussing it with me
3 I should be asked directly if I want to participate in the second trial, and given the option to discuss it with my doctor if I want to
-
