

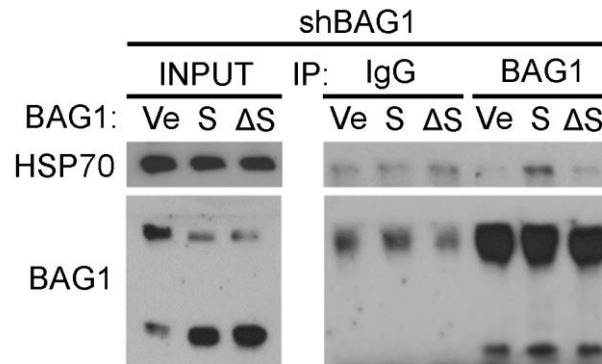

**Figure S2. Verification of HSP70 interaction with BAG1S and not BAG1ΔS**

**Figure S2. Verification of HSP70 interaction with BAG1S and not BAG1ΔS**

U2OS MYC-ER cell lysates subjected to a BAG1 IP under non-denatured conditions using A/G beads. Precipitates probed for HSP70 to detect interaction with BAG1S and lapsed interaction with BAG1ΔS. Confirmation of pull-down and sufficient knockdown of endogenous BAG1 was observed by probing for BAG1.
