

A**B****C****D**

Supplementary Figure 3 Diagnostic value of single and combined inflammation markers ratios in early-stage PC. **A** The ROC curve analysis of FAR, FPR, FLR, and CA199 between PC and HC in testing set 2. **B** The ROC curve analysis of combined FAR, FPR, FLR, and CA199 in PC and HC in testing set 2. **C** The ROC curve analysis of combined FAR, FPR, FLR, and CA199 between PC and OPT in testing set 2. **D** The ROC curve analysis of combined FAR, FPR, FLR, and CA199 between PC and OPT in testing set 2. Abbreviations: PC, pancreatic cancer; OPT, other pancreas tumors; HC, healthy controls; FAR, fibrinogen-to-albumin ratio; FPR, fibrinogen-to-prealbumin ratio; FLR, fibrinogen-to-lymphocyte ratio; ROC, receiver operating characteristic.
