

Randomized patients
n = 664 (100%)

Failed to or delayed
taking randomized medication
n = 16 (2.4%)

Initiated on
randomized medication
n = 648 (97.6%)

Patients excluded due
to missing values
n = 31 (4.7%)

Analytical dataset
for the predictive model
n = 617 (92.9%)

Completers
n = 304 (46.9%)

Switchers
n = 191 (29.5%)

Discontinued early
(without switching)
n = 153 (23.6%)
