Additional file 1: Table S1. Concordance of diagnoses assessed by expert opinion and by the MINI

## Diagnoses assessed by the MINI

Diagnoses assessed by expert opinion

| Diagnoses                | 1. | 2. | 3.       | 4. | 5. | 6.       | 7. | 8. | 9.       | 10.      | 11. | 12. | 13.      |
|--------------------------|----|----|----------|----|----|----------|----|----|----------|----------|-----|-----|----------|
| 1.Major depressive       | 2  | 3  | 1        |    |    |          |    |    |          |          |     |     | 1        |
| episode, current         |    |    |          |    |    |          |    |    |          |          |     |     |          |
| 2.Major depressive       | 4  | 5  |          |    |    |          |    |    |          | 1        |     |     | 4        |
| episode, recurrent       |    |    |          |    |    |          |    |    |          |          |     |     |          |
| 3.Dysthymia              |    |    | <u>1</u> |    |    |          |    |    |          |          |     |     |          |
| 4.Agoraphobia            |    |    |          |    |    |          |    |    |          |          |     |     |          |
| 5.Social phobias         |    |    |          |    | 4  |          |    |    |          |          |     |     |          |
| 6.Panic disorder         |    |    |          | 1  |    | <u>3</u> |    |    |          |          |     |     |          |
| 7.Generalised            |    |    |          | 1  |    | 1        |    |    |          |          |     |     |          |
| anxiety disorder         |    |    |          |    |    |          |    |    |          |          |     |     |          |
| 8.Post-traumatic         |    |    |          |    |    |          | 1  | 1  |          |          |     |     |          |
| stress disorder          |    |    |          |    |    |          |    |    |          |          |     |     |          |
| 9.Alcohol dependence     |    |    |          |    |    |          |    |    | <u>2</u> |          |     |     |          |
| and abuse                |    |    |          |    |    |          |    |    |          |          |     |     |          |
| 10.Drug dependence       |    |    |          |    |    |          |    |    |          | <u>1</u> |     |     |          |
| and abuse                |    |    |          |    |    |          |    |    |          |          |     |     |          |
| 11.Psychotic disorders   |    |    |          |    |    |          |    |    |          |          | 1   |     |          |
| 12.Dissocial personality |    |    |          |    |    |          |    |    |          |          |     | 1   |          |
| disorder                 |    |    |          |    |    |          |    |    |          |          |     |     |          |
| 13.No diagnosis          |    | 1  |          | 1  | 3  | 5        | 1  | 1  |          | 1        |     |     | <u>2</u> |
| 14.Other                 | 2  |    | 2        |    |    | 1        |    | 1  | 1        | 1        |     | 1   | 14       |

The table includes only the diagnoses that were applied by the assessors. The vertical axis represents the diagnoses in the assessment by the expert opinion. The horizontal axis represents the diagnoses given in the MINI interview. The numbers in the cells show the frequency of each combination of diagnoses. <u>Underlined numbers</u> indicate full agreement.
