

Iterative process between purpose and questions

Decision about methods

Research purposes	Theoretical drive	Research questions	Standard approaches	Opportunities for using MM
Understand complex phenomena	Inductive	- What are the mechanisms and the contextual factors that allow the school community to develop an HP approach?	Qualitative research	Standard plus quantitative research using multivariate techniques taking multiple points of view into account
Measure change	Deductive	- How do the strategies developed through the program influence the development of teachers' HP practices and the schools' health promoting environment? - How do these practices affect well-being in the schools? - What is the influence of the program on the children's perceived life skills?	Quantitative approaches	Standard plus qualitative research using open-ended process
