

Assessed for eligibility
No. clusters =176 family physician/nurse
2937 subjects
13 regions

110 lost because they did not attend the first interview

Randomized = 176 family physician/nurse
2827 subjects with valid information

Control

Intervention

Allocated = 82 family physician/nurse
range (4-31 subjects per cluster)
1345 subjects

Allocated = 94 family physician/nurse
range (1-28 subjects per cluster)
1482 subjects

Follow-up at 1 year

703 smokers
177 ex-smokers
Subjects lost to follow-up:
403 lost: no follow-up interview
62 lost: former smoker interview but no at 1 year

754 smokers
248 ex-smokers
Subjects lost to follow-up:
361 lost: no follow-up interview
119 lost: former smoker interview but no at 1 year

Intention to treat
Former smokers ≥ 6 months

Analyzed:
1250 smokers
84 former smokers
11 missing

Analyzed:
1306 smokers
166 former smokers
10 missing
