Schools assessed for eligibility ( 20 schools)

Randomization on school-level (18 schools, $\mathrm{n}=636$ )

Allocated to intervention group (15 schools, $\mathrm{n}=531$ )

- Received complete intervention (6 schools, $\mathrm{n}=192$ )
- Did not receive intervention (not all four modules were administered) (11 schools, $\mathrm{n}=339$ )

Lost to follow-up (post-test not filled out)
( $\mathrm{n}=9$ )
Discontinued intervention ( $\mathrm{n}=0$ )

Allocated to wait-control group
(3 schools, $\mathrm{n}=105$ )

- Received allocated intervention (=no intervention) ( $\mathrm{n}=105$ )
- Did not receive allocated intervention ( $\mathrm{n}=0$ )

Lost to follow-up ( $\mathrm{n}=0$ )
Discontinued intervention ( $\mathrm{n}=0$ )

Analyzed ( $\mathrm{n}=83$ )

- Excluded from analysis (missing internal plausibility) ( $\mathrm{n}=22$ )
