

# Supplementary Fig.

S1a

	Number at risk					
	0	1	2	3	4	5
R0	16	15	9	5	4	3
R1	1	1	1	0	0	0

S1b

	Number at risk					
	0	1	2	3	4	5
R0	4	4	3	0	0	0
R1/R2	2	2	2	2	0	0

**Supplementary figure 1.** Kaplan–Meier survival curves for patients with category 2 (a, N = 17) and category 4 (b, N = 6) stage IV gastric cancer stratified by the residual tumor status after conversion surgery. \* Follow-up time: time from the start of initial chemotherapy to the date of death or of the last follow-up visit

Category 2 = distant metastasis that are regarded as technically and oncologically unresectable tumor without peritoneal dissemination. Category 4 = macroscopic peritoneal dissemination with other distant metastasis.
