Delphi Survey Questionnaire Round Three (online version)

Round three Questionnaire

Connecting with parents and children before, and after, the death of a parent.

Welcome to round three, the final round of the Delphi survey.

I received a fabulous response to round two so thank you to all who responded for your contribution. Everyone's opinions are important in helping me to design an intervention to support nurses and social workers to connect with parents and children before, and after, the death of a parent.

In this round, you and other panel members will be presented with all of the statements that were in the previous round of this survey. The email linking you to this survey shows your previous responses to these statements, along with the average response from panel members.

I am now giving you the opportunity to re-consider your responses in light of the panel average and change them should you wish.

Please complete each question again, this is because I'm interested to see if responses remain the same or change over time.

The survey should take no longer than ten minutes to complete. You can complete it in more than one session and can return to it as many times as you like until complete and you click the submit button. If you do not want to complete the survey, just close the survey window and do not click submit.

Please make sure that you enter your Unique Reference Number (URN) that is in the email regarding this survey. I will need it to analyse the data provided.

Additional file 3 Delphi survey round three questionnaire (online version)

Please let me know if you want me to email you with a summary of the findings.

By ticking each box you are consenting to taking part in a Delphi survey. It will be assumed that un-ticked boxes mean that you DO NOT consent to that part of the study and you may be deemed ineligible for the study.

I confirm that I have read and understood the information for the above study. I have had the opportunity to consider the information and asked questions which have been answered satisfactorily.

I understand that my participation is voluntary and that I am free to withdraw at any time during the study without giving any reason and without being disadvantaged in any way. Furthermore, I understand that I will be able to withdraw my data up to two weeks after the end of each round of the Delphi survey.

I consent to the processing of my personal information for the purposes explained to me. I understand that such information will be handled in accordance with data protection regulations.

I understand that my information may be subject to review by responsible individuals from the University of Surrey and/or regulators for monitoring and audit purposes.

I understand that confidentiality and anonymity will be maintained and the researcher will not identify me in any research output.

I agree to be contacted in the future by University of Surrey researchers who would like to invite me to participate in follow up studies to this project, or in future studies of a similar nature.

I agree that the research team may use my anonymised data for future research and understand that any use of identifiable data would be reviewed and approved by a research ethics committee. (In such cases, as with this project, data would not be identifiable in any report).

By ticking this Yes box you are consenting to take part in the survey.

Yes

Please enter you Unique Reference Number (URN) below.

For each statement, please indicate your agreement by clicking on one of the buttons to the right of the statement.

1. The following statements concern issues for nurses and social workers **before the death of a parent.**

For each statement, please indicate your agreement by clicking on one of the buttons to the right of the statement.

You can write additional comments in the text box below this section.

Nurses and social workers have challenges with:

1.1 finding the right time to initiate a conversation with families about how to prepare children for the death of a parent.

- Strongly agree**
- Agree**
- Neither agree nor disagree**
- Disagree**
- Strongly disagree**
- N/A**

1.2 knowing family members' readiness to engage with members of the health and social care workforce about how to prepare children for the death of a parent.

- Strongly agree**
- Agree**
- Neither agree nor disagree**
- Disagree**
- Strongly disagree**
- N/A**

1.3 engaging with families in preparing their children for the death of a parent when families do not wish for the children to know about parents' illness.

- Strongly agree**
- Agree**
- Neither agree nor disagree**
- Disagree**
- Strongly disagree**
- N/A**

1.4 developing relationships in which family members feel comfortable in asking for support to prepare children for the death of a parent.

- Strongly agree**
- Agree**
- Neither agree nor disagree**
- Disagree**
- Strongly disagree**
- N/A**

1.5 understanding the needs of families from diverse cultural backgrounds when engaging in conversation about preparing children for the death of a parent.

- Strongly agree**
- Agree**
- Neither agree nor disagree**
- Disagree**
- Strongly disagree**
- N/A**

2. The following statements are about what is missing in the way support is provided by nurses and social workers to families with children **before the death of a parent**.

For each statement, please indicate your agreement by clicking on one of the buttons to the right of the statement.

There are gaps in support provided by nurses and social workers to parents and children:

2.1 because ill parents move between care settings, for example when they move from hospital to hospice or home palliative care.

- Strongly agree**
- Agree**

Neither agree nor disagree

The following statements are about what is missing in the way support is provided by nurses and social workers to families and children **after the death of a parent**.

For each statement, please circle your level of agreement.

There are gaps in support provided by nurses and social workers to parents and children :

4.1 because of their lack of understanding of the impact of children's developmental stages on their bereavement support needs.

Strongly agree

Agree

Neither agree nor disagree

Disagree

Strongly disagree

N/A

4.2 because of their lack of skills enabling them to connect with families to help them to support bereaved children.

Strongly agree

Agree

Neither agree nor disagree

Disagree

Strongly disagree

N/A

4.3 because of lack of prioritisation by the nursing workforce of the importance of building relationships with families to help them to support bereaved children.

Strongly agree

Agree

Neither agree nor disagree

Disagree

Strongly disagree

N/A

4.4 because of lack of prioritisation by the social care workforce of the importance of building relationships with families to help them to support bereaved children.

Strongly agree

Agree

Neither agree nor disagree

Disagree

Strongly disagree

N/A

4.5 because of their lack of contact with the families of bereaved children.

Strongly agree

Agree

Neither agree nor disagree

Disagree

Strongly disagree

N/A

4.6 because of their insufficient knowledge of how long to continue to support families with bereaved children.

Strongly agree

Agree

Neither agree nor disagree

The following statements are priorities that are important for inclusion in the future development of an intervention. The intervention will enhance the provision of support to families and their children by nurses and social workers **before, and after, the death of a parent.**

Please drag and drop these into your preferred order.

Training in opening conversations with families about children's needs before the death of a parent.

1

Training in opening conversations with families about children's needs after the death of a parent.

2

Training in managing own emotions that arise during conversations with families about children's needs regarding the death of a parent.

3

Training in handling family members' emotions that arise during conversations with families about children's needs regarding the death of a parent.

4

Increasing knowledge of existing sources of information (written, online and audio-visual materials) to help to support families, before the death of a parent.

5

Increasing knowledge of existing sources of information (written, online and audio-visual materials) to help them to support families, after the death of a parent.

6

Developing resources for nurses and social workers to support their engagement with families about the needs of children regarding the death of a parent.

7

Is there anything else you would like to add? If so, please write your comments in the text box below.

Thank you for completing the third round of this survey. If you wish me to provide you with a summary of findings please do not hesitate to email me.

By clicking the right blue arrow you will be submitting your responses.
