

Review of records detailing UP-diagnosed cases.
Information to district and local health facilities to
recruit female community health volunteers

Female community health volunteers visit
enlisted women to encourage them to attend UP
follow-up outreach clinics in the study VDCs

Interview with 115 UP-affected women
(23% of 495 affected) who
visited follow-up outreach clinics

Analysis of quantitative data from 115 interviews
regarding women's experiences and health care
seeking practices in relation to UP

16 in-depth interviews with selected women of two
VDCs to capture their voices and emotions
regarding daily and past experiences of UP
