Additional file

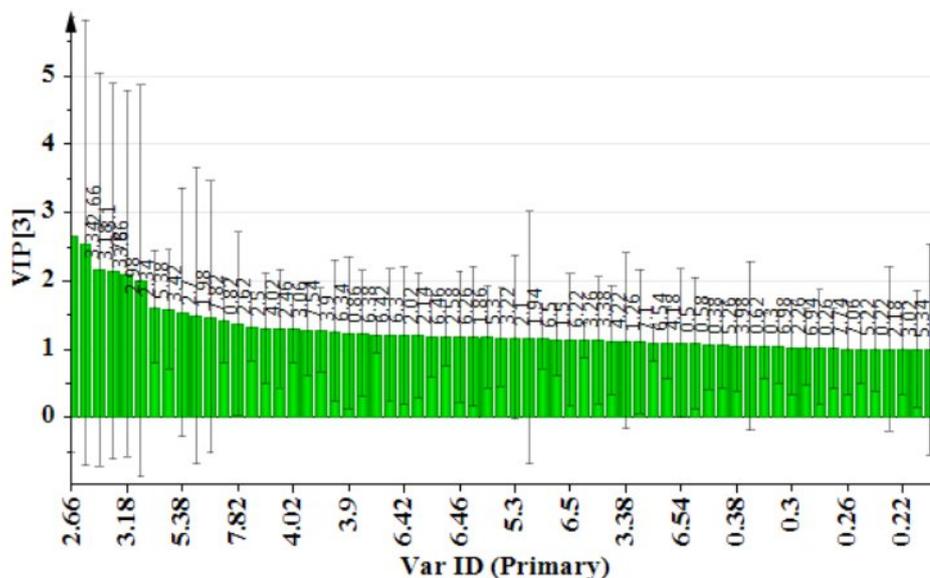

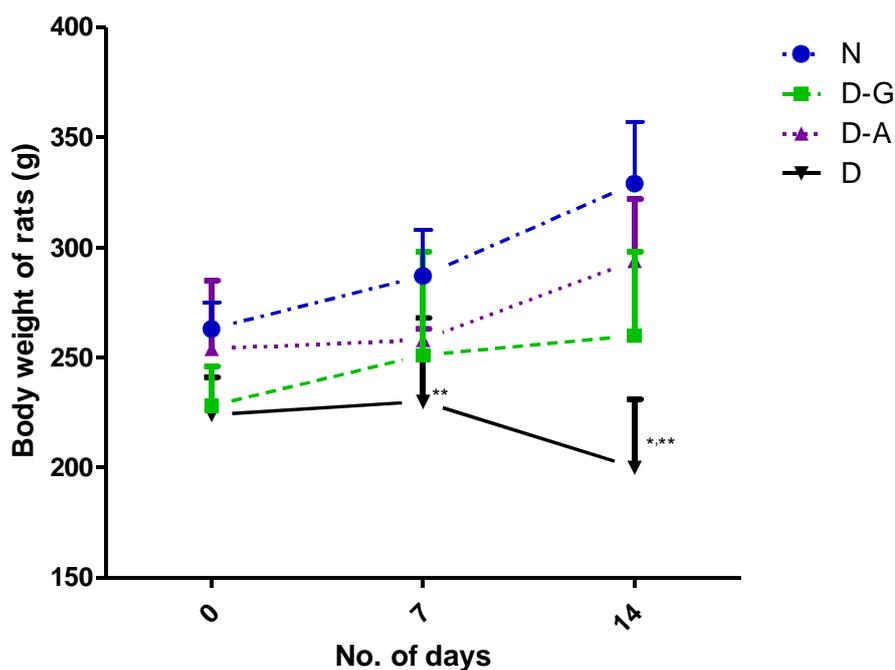

Figure S1. VIP score and variable regions of the assigned metabolites

Figure S2. Body weight of rats in day 0, day 7 and day 14 of treatment. Data are expressed as mean ± S.D.; *n*=5 rats per group. N= normal rat, D = diabetic rat, D-G= diabetic rat treated with glibenclamide, D-E= diabetic rat treated with OS ethanol extract, D-A= diabetic rat treated with OS water extract. *p≤0.05 versus normal control in same day, **p≤0.05 versus day 0 and other day in same group.
