

Monocarboxylate Transporter 1 (MCT1) is an independent prognostic biomarker in endometrial cancer

Ayşe Latif¹, Amy L. Chadwick^{1,2}, Sarah J. Kitson², Hannah J. Gregson², Vanitha N. Sivalingam², James Bolton³, Rhona J. McVey³, Stephen A. Roberts⁴, Kay M. Marshall¹, Kaye J. Williams¹, Ian J. Stratford¹, Emma J. Crosbie^{2,5*}

Supplementary Figure 1: Kaplan-Meier survival analysis for grade I/II tumours. In grade I/II tumours **(a)** Recurrence free survival; there were two recurrences in each of the low and high MCT1 expressing tissues. **(b)** Overall survival; there was only one death in the low MCT1 tumours and non in the high MCT1 expressing tumours. As there were no events in grade I/II tumours no plot can be drawn for cancer specific survival.
