

A Condition 1:
High risk for CHD events
N = 6,615; prevalence = 49%

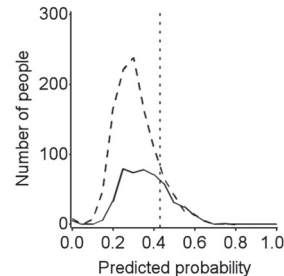

B Condition 2:
Very high risk for CHD events
N = 6,615; prevalence = 14%

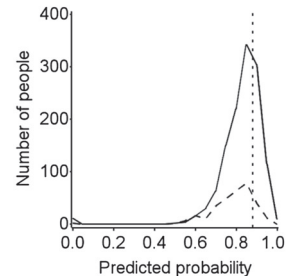

C Condition 3:
Framingham risk score >20%
N = 3,720; prevalence = 9%

D Condition 4:
LDL cholesterol ≥ 100 mg/dL
N = 1,583; prevalence = 30%

E Condition 5:
LDL cholesterol ≥ 70 mg/dL
N = 1,583; prevalence = 80%
