

## ADDITIONAL FILE 1

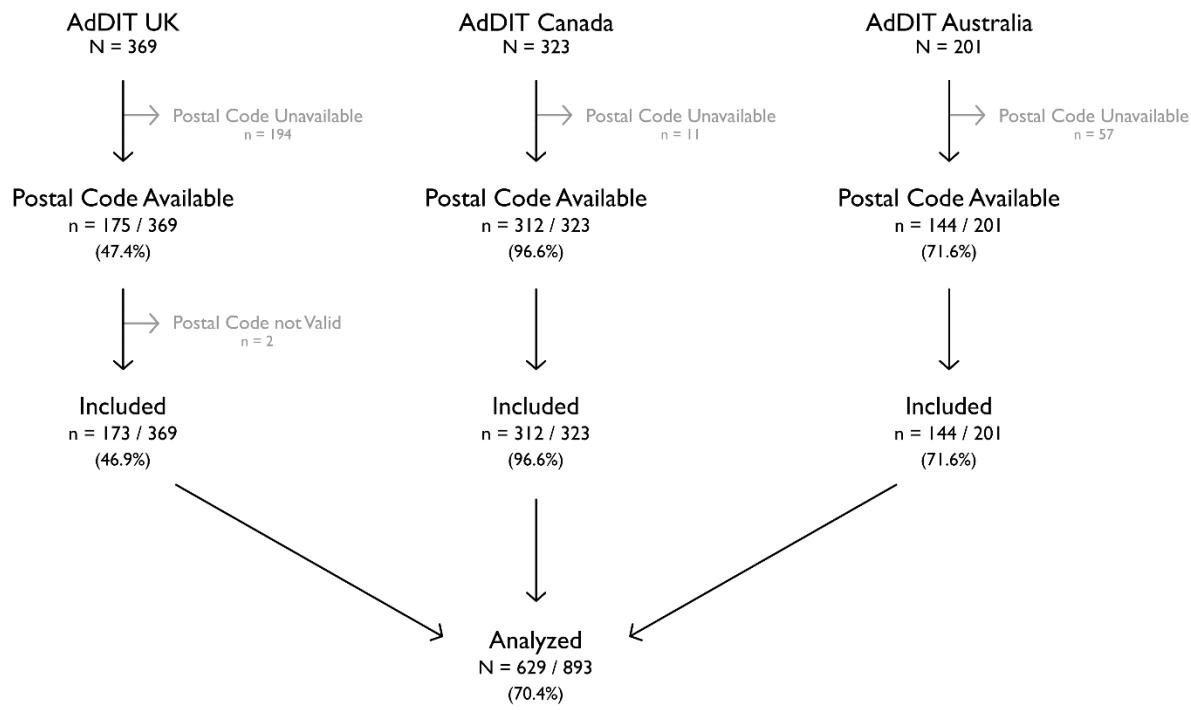

**Table S1.** Country-specific measures of deprivation, and sources of regional and national reference type 1 diabetes population data.

Characteristics	AdDIT UK	AdDIT Canada	AdDIT Australia
<b>Deprivation Measure</b>	Index of Multiple Deprivation (IMD) 2015	Canadian Marginalization Index (CAN-Marg) 2016	Socioeconomic Indices for Areas (SEIFA) 2016
<b>Sub-Domain</b>	N/A	Material Resources (MR)	Index of Relative Socioeconomic Disadvantage (IRSD)
<b>Geographic Unit</b>	Lower-layer Sorting Output Area (LSOA)	Dissemination Area (DA)	Postcode Area (POA)
<b>Pediatric Type 1 Diabetes References</b>	UK	Canada	Australia
<b>Regional</b>	National Pediatric Diabetes Audit (NPDA) 2015-16 & 2019-20	Regional data from the Hospital for Sick Children	Australasian Diabetes Data Network (ADDN)
<b>National</b>	National Pediatric Diabetes Audit (NPDA) 2015-16	Canadian Chronic Disease Surveillance System (CCDSS) 2016 & Pediatric Diabetes Network 2017-18	Australian Institute of Health & Welfare Data (AIHW) 2018

**Table S2:** Raw counts and proportions of the UK, Canadian and Australian cohorts of AdDIT across deprivation quintiles. Intra-quintile differences are presented.

AdDIT Cohort	Reference Population	Type	Index	Quintile	AdDIT		Reference		OR	95% CI		P			
					N	%	N	%		Low	High				
UK	NPDA	National	IMD 2015	Q1 (most)	8	4.6	5,823	21.6	0.176	0.075	0.354	<0.0001

**Figure S1.** Flowchart of study participants from the original AdDIT UK, AdDIT Canada and AdDIT Australia cohorts included in the current study.

**Figure S2.** Distribution of the Experimental and Observational study arms among the A) AdDIT UK and B) AdDIT Canada cohorts across country-specific deprivation quintiles. Bars in colour represent the Experimental Arm whereas bars in white represent the Observational Arm. All participants of the AdDIT Australia cohort were part of the Experimental Arm and thus not included.
