

Additional File 2: Isotype antibody staining.

Additional File 2. Confocal images of isotype antibody staining of lung sections from WT and MyD88 KO mice repetitively exposed to ODE for 3 weeks, rested for 4 weeks, and then rechallenged once with ODE or saline. Treatment groups denoted as S-S (saline repeated exposure-saline rechallenge), O-S (ODE repeated exposure-saline rechallenge), S-O (saline repeated exposure-ODE rechallenge), O-O (ODE repeated exposure-ODE rechallenge).
