

Risk of ischaemic heart disease

**Hazard /
Odds ratio**

Remnant cholesterol

Observational: Elevated plasma levels

Causal: Genetically elevated levels

1.37 (1.27-1.47)

2.82 (1.92-4.15)

Remnant cholesterol to HDL cholesterol ratio

Observational: Elevated plasma levels

Causal: Genetically elevated levels

1.23 (1.19-1.27)

2.94 (1.90-4.55)

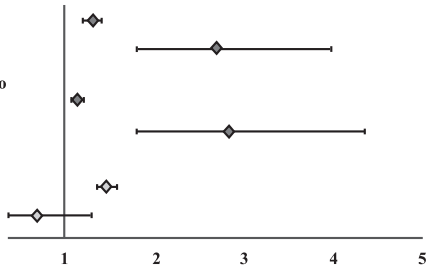

HDL cholesterol

Observational: Reduced plasma levels

Causal: Genetically reduced levels

1.55 (1.43-1.68)

0.74 (0.40-1.37)

Hazard / Odds ratio for a 1 mmol/L or ratio increase / decrease (95% CI)
