

Additional file 3: Results of analysis of variance and backfitting model of mosquito densities.

Table S3a. Categorical values encountered during processing.

Site (3 levels)	Emakhaha/Mbale , Emutete, Iguru
Season (3 levels)	Prior intervention (February/March) , Post intervention (May), Late season (July/August)
ICON (2 levels)	Applied (yes), not applied (no)
ITN (2 levels)	With ITN (yes), without ITN (no)

2010 Data

Table S3b. Analysis of variance – full model. Dependent variable: anopheles adult density (female/house/night) in 2010. See Table S3a for independent variable descriptions.
