

Additional File 2. Amplification curves of NR-qPCR performed on field samples infected with *P. vivax* (n=3; red), *P. falciparum* (n=3; blue), *P. malariae* (n=3; green), and *P. brasilianum* DNA (n=1; orange). The amplification plots are shown for **(A)** Pvr47 and **(B)** Pfr364 assays.

PCPv = positive control of *P. vivax*; PCPf = positive control of *P. falciparum*.
